- [240] "Lubricating Oils Containing Metal Derivatives," U.S. Patent 2,628,942 (February 17, 1953). Inventors: J. R. Morris and J. R. Roach.
- [241] "Modified Olefin-diolefin Resin," U.S. Patent 2,634,256 (April 7, 1953). Inventors: W. J. Sparks, D. W. Young, Roselle, and J. D. Garber.
- [242] "Reaction Product of High Molecular Weight Succinic Acids and Succinic Anhydrides with an Ethylene Polyamine," U.S. Patent 3,172,892 (March 9, 1965). Inventors: W. M. Le Suer and G. R. Norman.
- [243] "Novel Carboxylic Acid Acylating Agents, Derivatives Thereof, Concentrate and Lubricant Compositions Containing the Same, and Processes for Their Preparation," U.S. Patent 4,234,435 (November 18, 1980). Inventors: N. A. Meinhardt and K. E. Davis.
- [244] "Lubricant," U.S. Patent 3,215,707 (November 2, 1965). Inventor: R. J. Rense.
- [245] Weill, J. and Sillion, B., "Reaction of Chlorinated Polyisobutene with Maleic Anhydride: Mechanism of Catalysis by Dichloromaleic Anhydride," *Revue de l'Institut Francais du Petrole*, Vol. 40, No. 1, 1985, pp. 77–89, Also see J. Weill's Ph.D. Dissertation, 1982.
- [246] "Process for Manufacturing Anhydrides of Alkenyl Dicarboxylic Acids," U.S. Patent 4,433,157 (February 21, 1984). Inventors: J. Weill, J. Garapon, and B. Sillion.
- [247] "Treatment of Organic Compounds to Reduce Chlorine Level," U.S. Patent 5,708,097 (January 13, 1998). Inventors: C. K. Baumanis, M. M. Maynard, A. C. Clark, M. R. Sivic, C. P. Kovall, and D. L. Westfall.
- [248] "Low Chlorine Polyalkylene Substituted Carboxylic Acylating Agent Compositions and Compounds Derived Therefrom," U.S. Patent 5,885,944 (March 23, 1999). Inventors: J. K. Pudelski, M. R. Sivic, K. F. Wollenberg, R. Yodice, J. Rutter, and J. G. Dietz.

- [249] "Low Chlorine Content Composition for Use in Lubricants and Fuels," U.S. Patent 6,077,909 (June 20, 2000). Inventors: J. K. Pudelski, C. J. Kolp, J. G. Dietz, C. K. Baumanis, S. L. Bartley, and J. D. Burrington.
- [250] Wollenberg, K. F. and Pudelski, J. K., "Preparation, NMR Characterization and Lubricant Additive Application of Novel Polyisobutenyl Phthalic Anhydrides," *Symposium on Recent Advances in the Chemistry of Lubricant Additives*, Paper Presented before the Division of Petroleum Chemistry, Inc., 218th National Meeting of the American Chemical Society, New Orleans, LA, August 22–26, 1999.
- [251] "One-step Process for the Preparation of Alkenyl Succinic Anhydride," U.S. Patent 5,319,030 (June 7, 1994). Inventors: J. J. Harrison, R. Ruhe, Jr., and R. William.
- [252] "Two-step Thermal Process for the Preparation of Alkenylsuccinic Anhydride," U.S. Patent 5,625,004 (April 29, 1997). Inventors: J. J. Harrison, R. Ruhe, Jr., and R. William.
- [253] Morrison, R. T. and Boyd, R. N., "The Diels-Alder Reaction," *Organic Chemistry*, 3rd ed., Section 27.8, Allyn and Bacon, Inc., Boston, 1976, pp. 876–878.
- [254] "Hydroxy-group Containing Acylated Nitrogen Compounds Useful as Additives for Lubricating Oil and Fuel Compositions," U.S. Patent 5,696,067 (December 9, 1997). Inventors: P. E. Adams, M. R. Baker, and J. G. Dietz.
- [255] "Mixed Carboxylic Compositions and Derivatives and Use as Lubricating Oil and Fuel," U.S. Patent 6,030,929 (February 29, 2000). Inventor: J. K. Pudelski.
- [256] "Substituted Carboxylic Acylating Agent Compositions and Derivatives Thereof for Use in Lubricants and Fuels," U.S. Patent 5,912,213 (June 15, 1999). Inventors: M. R. Baker, J. G. Dietz, and R. Yodice.
- [257] "Acylated Nitrogen Compounds Useful as Additives for Lubricating Oil and Fuel Compositions," U.S. Patent 5,856,279 (January 5, 1999). Inventor: M. R. Baker.
- [258] "Process for Preparing Condensation Product of Hydroxy-substituted Aromatic Compounds and Glyoxylic Reactants," U.S. Patent 6,001,781 (December 14, 1999). Inventors: M. R. Baker, K. M. Hull, and D. L. Westfall.
- [259] "Intermediates Useful for Preparing Dispersant-viscosity Improvers for Lubricating Oils," U.S. Patent 6,117,941 (September 12, 2000). Inventors: P. E. Adams, R. M. Lange, R. Yodice, M. Baker, and J. Dietz.
- [260] "Nitrogen Containing Dispersant-viscosity Improvers," U.S. Patent 6,492,306 (December 10, 2002). Inventors: M. R. Sivik, R. M. Lange, D. M. Vargo, and P. E. Adams.
- [261] "Alkylation of Phenols," *Kirk-Othmer Encyclopedia of Chemical Technology*, Vol. 1, 1963, pp. 894–895 and "Ion Exchange," *Kirk-Othmer Encyclopedia of Chemical Technology*, Vol. 2, 1967 pp. 871–899, Interscience Publishers, NY.
- [262] "Aromatic Mannich Compound-containing Composition and Process for Making Same," U.S. Patent 6,179,885 (January 30, 2001). Inventor: J. R. McAtee.
- [263] "Manufacture of Alkylphenol Compounds," U.S. Patent 4,202,199 (May 13, 1980). Inventors: F. Merger, and G. Nestler.
- [264] "Methods for Preparing Alkylated Hydroxyaromatics," U.S. Patent 5,663,457 (September 2, 1997). Inventor: C. J. Kolp.
- [265] "Ethylene Amines," *Kirk Othmer's Encyclopedia of Chemical Technology*, 2nd ed., Interscience Publishers, NY, Vol. 7, 1965, pp. 22–37.
- [266] "Amines II. Reactions," *Organic Chemistry*, R. T. Morrison, and R. N. Boyd, Eds., 3rd ed., Allyn and Bacon, Inc., Boston, Section 23.1, 1976 pp. 745–748.
- [267] "High Molecular Weight Nitrogen-containing Condensates and Fuels and Lubricants Containing Same," U.S. Patent 5,053,152 (October 1, 1991). Inventor: T. F. Steckel.
- [268] "Preparation of Tris(hydroxymethyl)aminomethane," U.S. Patent 4,233,245 (November 11, 1980), Inventors: J. Bourguignon, M-X Sion, and M. Moreau.
- [269] "Dispersants and Process for Their Preparation," U.S. Patent 3,980,569 (September 14, 1976). Inventors: J. F. Pindar, J. M. Cohen, and C. P. Bryant.
- [270] "Artificial Resins and Method of Making," U.S. Patent 2,098,869 (November 9, 1937). Inventors: J. Harmon, and F. M. Meigs.
- [271] "Aminoalkylation and Amidoalkylation," *Advanced Organic Chemistry, Reactions, Mechanisms, and Structure* by J. March, 4th ed., Chapter 11 on Aromatic Electrophilic Substitution, Section 1–25, Wiley-Interscience Publication, 1992, pp. 550–551.
- [272] "Ethylenediamine Salts of Thiophosphonic Acids," U.S. Patent 3,185,728 (May 25, 1965). Inventors: E. E. Schallenberg and R. G. Lacoste.
- [273] "Friction Reducing Agents for Lubricants," U.S. Patent 3,702,824 (November 14, 1972). Inventor: R. C. Schlicht.
- [274] "Olefin-thionophosphine Sulfide Reaction Products, Their Derivatives, and Use Thereof as Oil and Fuel Additives," U.S. Patent 4,042,523 (August 16, 1977). Inventor: S. J. Brois.
- [275] "Olefin-thionophosphine Sulfide Reaction Products, Their Derivatives, and Use Thereof as Oil and Fuel Additives," U.S. Patent 4,100,187 (July 11, 1978). Inventor: S. J. Brois.
- [276] "Oil Containing Dispersant VII Olefin Copolymer," U.S. Patent 4,715,975 (December 29, 1987). Inventors: M. M. Kapuscinski, B. J. Kaufman, and C. S. Liu.
- [277] "Dispersant-antioxidant Multifunction Viscosity Index Improver," U.S. Patent 4,699,723 (October 13, 1987). Inventors: M. M. Kapuscinski and R. E. Jones.
- [278] "Dispersant Anti-oxidant VI Improver and Lubricating Oil Composition Containing Same," U.S. Patent 4,948,524 (August 14, 1990). Inventors: M. M. Kapuscinski, T. E. Nalesnik, R. T. Biggs, H. Chafetz, and C. S. Liu.
- [279] "Lubricant for Use in Diesel Engines," U.S. Patent 6,187,721 (February 13, 2001). Inventors: I. Goldblatt, M. McHenry, K. Henderson, D. Carlisle, N. Ainscough, M. Brown, and R. Tittel.
- [280] "Graft Copolymers and Lubricants Containing Such as Dispersant-viscosity Improvers," U.S. Patent 5,298,565 (March 29, 1994). Inventors: R. M. Lange and C. V. Luciani.
- [281] "Dispersant Viscosity Index Improvers," U.S. Patent 6,083,888 (July 4, 2000). Inventor: R. J. Sutherland.
- [282] "Lubricating Oils and Fuels Containing Graft Copolymers," U.S. Patent 3,506,574 (April 14, 1970). Inventors: R. L. Stambaugh and R. D. Bakule.
- [283] "Viscosity Index Improvers with Dispersant Properties Prepared by Reaction of Lithiated Hydrogenated Copolymers with 4-Substituted Aminopyridines," U.S. Patent 4,402,843 (September 6, 1983). Inventor: W. J. Trepka.
- [284] "Viscosity Index Improvers with Dispersant Properties Prepared by Reaction of Lithiated Hydrogenated Copolymers with Substituted Aminolactams," U.S. Patent 4,402,844

- (September 6, 1983). Inventor: W. J. Trepka.
- [285] "Viscosity Improvers for Lubricating Oil Compositions," U.S. Patent 6,124,249 (September 26, 2000). Inventors: J. G. Seebauer and C. P. Bryant.
- [286] "Dispersant-viscosity Improvers for Lubricating Oil Compositions," U.S. Patent 5,969,068 (October 19, 1999). Inventors: C. P. Bryant, B. A. Grisso, and R. Cantiani.
- [287] "Dispersant-viscosity Improvers for Lubricating Oil Compositions," U.S. Patent 5,821,313 (October 13, 1998). Inventors: M. R. Sivic and C. P. Bryant.
- [288] "Dispersant-viscosity Improvers for Lubricating Oil Compositions," U.S. Patent 5,512,192 (April 30, 1996). Inventors: R. M. Lange and C. V. Luciani.
- [289] "Dispersant-viscosity Improvers for Lubricating Oil Compositions," U.S. Patent 5,540,851 (July 30, 1996). Inventor: R. M. Lange.
- [290] "Graft Copolymers from Solvent-free Reactions and Dispersant Derivatives Thereof," U.S. Patent 5,429,758 (July 4, 1995). Inventors: K. Hayashi, T. R. Hopkins, and C. R. Scharf.
- [291] "Novel VI Improver, Dispersant, and Anti-oxidant Additive and Lubricating Oil Composition Containing Same," U.S. Patent 4,863,623 (September 5, 1989). Inventor: T. E. Nalesnik.
- [292] "Functionalized Graft Co-polymer as a Viscosity Index Improver, Dispersant, and Anti-oxidant Additive and Lubricating Oil Composition Containing Same," U.S. Patent 5,409,623 (April 25, 1995). Inventors: M. K. Mishra and I. D. Rubin.
- [293] "Lubricating Oil Containing Dispersant Viscosity Index Improver," U.S. Patent 5,520,829 (May 28, 1996). Inventors: M. K. Kapuscinski, C. S. Liu, L. D. Grina, and R. E. Jones.
- [294] "Process for Making Dispersant Viscosity Index Improvers," U.S. Patent 5,486,563 (January 23, 1996). Inventor: R. J. Sutherland.
- [295] "Star-shaped Dispersant Viscosity Index Improver," U.S. Patent 4,077,893 (March 7, 1978). Inventor: T. E. Kiovsky.
- [296] "Multifunctional Viscosity Index Improver-dispersant Anti-oxidant," U.S. Patent 5,439,607 (August 8, 1995). Inventor: A. O. Patil.
- [297] "Lubricants Containing Ashless Antiwear-dispersant Additive Having Viscosity Index Improver Credit," U.S. Patent 5,698,500 (December 16, 1997). Inventors: J. R. Baranski and C. A. Migdal.
- [298] "Dispersant Viscosity Index Improvers," U.S. Patent 5,360,564 (November 1, 1994). Inventors: R. J. Sutherland and R. B. Rhodes.
- [299] Brady, J. E. and Humiston, G. E., "Chemical Bonding: General Concepts—Polar Molecules and Electronegativity," *General Chemistry: Principles and Structure*, 2nd ed., Section 4.8, John Wiley and Son, NY, 1978, pp. 114–117.
- [300] "Dispersant Additives and Process," U.S. Patent 5,804,667 (September 8, 1998), and U.S. Patent 5,936,041 (August 10, 1999). Inventors: W. B. Diana, J. V. Cusumano, K. R. Gorda, J. Emert, W. B. Eckstrom, D. C. Dankworth, J. E. Stanat, and J. P. Stokes.
- [301] "Ashless Dispersants Formed from Substituted Acylating Agents and Their Production and Use," U.S. Patent 5,241,003 (August 31, 1993). Inventors: D. J. Degonia and P. G. Griffin.
- [302] "Oil Soluble Dispersant Additives Useful in Oleaginous Compositions," U.S. Patent 5,026,495 (June 25, 1991). Inventors: J. Emert, R. D. Lundberg, and A. Gutierrez.
- [303] "Middle Distillate Containing Storage Stability Additive," U.S. Patent 4,948,386 (August 14, 1990). Inventors: R. L. Sung, B. J. Kaufman, and K. J. Thomas.
- [304] "Non-ash Containing Lubricant Oil Composition," U.S. Patent 3,189,544 (June 15, 1965). Inventors: H. Ratner and R. F. Bergstrom.
- [305] "Reaction Products of Hydrocarbon-substituted Succinic Acid-producing Compound, an Amine, and an Alkenyl Cyanide," U.S. Patents 3,278,550 (October 11, 1966) and 3,366,569 (June 30, 1968). Inventors: G. R. Norman and W. M. Le Suer.
- [306] "Cleavage of Amine Oxides," *Advanced Organic Chemistry*, J. March, Ed., 4th ed., Chapter 17 on Eliminations, Section 7–8, Wiley-Interscience Publication, 1992, pp. 1018–1019.
- [307] "Hydrolysis of Amides," Section 20–13, pp. 671–672 and "Alkaline and Acidic Hydrolysis of Esters," Sections, 20.17 and 20.18, pp. 677–681, *Organic Chemistry*, R. T. Morrison and R. N. Boyd, 3rd ed., Allyn and Bacon, Inc., Boston, 1976.
- [308] Baczek, S. K., and Chamberlin, W. B., "Petroleum Additives," *Encyclopedia of Polymer Science and Engineering*, Second Edition John Wiley and Sons, Vol. 11, 1988, p. 22.
- [309] "Engine Oil Viscosity Classification," *SAE J300—Revised May 2004*, SAE Standard, Society of Automotive Engineers.
- [310] "Multigrade Lubricating Compositions Containing No Viscosity Modifier," U.S. Patent 5,965,497 (October 12, 1999). Inventors: D. R. Adams and P. Brice.
- [311] "High Functionality Low Molecular Weight Oil Soluble Dispersant Additives Useful in Oleaginous Compositions," U.S. Patent 5,788,722 (August 4, 1998). Inventors: J. Emert and R. D. Lundberg.
- [312] "Polymers Derived From Ethylene and 1—Butene for the Use in the Preparation of Lubricant Dispersant Additives," U.S. Patent 6,030,930 (February 29, 2000). Inventors: J. Emert, A. Rossi, S. Rea, J. W. Frederick, and M. W. Kim.
- [313] "Lubricating Oil Containing Dispersant VII and Pour Depressant," U.S. Patent 4,668,412 (May 26, 1987). Inventors: W. P. Hart and C. S. Liu.
- [314] "Ethylene Alpha-olefin/diene Interpolymer-substituted Carboxylic Acid Dispersant Additives," U.S. Patents 5,759,967 (June 2, 1998) and 5,681,799 (October 28, 1997). Inventors: W. R. Song, A. Rossi, H. W. Turner, H. W. Welborn, R. D. Lundberg, A. Gutierrez, and R. A. Kleist.
- [315] "Ethylene Alpha-olefin Polymer Substituted Mono- and Dicarboxylic Acid Dispersant Additives," U.S. Patent 5,433,757 (July 18, 1995). Inventors: W. R. Song, A. Rossi, H. W. Turner, H. C. Welborn, and R. D. Lundberg.
- [316] "Borated Ethylene Alpha-olefin Copolymer Substituted Mannich Base Lubricant Dispersant Additives," U.S. Patent 5,382,698 (January 17, 1995). Inventors: W. R. Song, R. D. Lundberg, A. Gutierrez, and R. A. Kleist.
- [317] "Polyalkylene Polysuccinimides and Post-treated Derivatives Thereof," U.S. Patent 6,146,431 (November 14, 2000). Inventors: J. J. Harrison and W. A. Ruhe, Jr.
- [318] "Ready Reference for Lubricant and Fuel Performance," *Lubrizol Publication*; 2004.
- [319] "Engine Oil Having Dithiocarbamate and Aldehyde/epoxide for Improved Seal Performance, Sludge and Deposit Performance," U.S. Patent 6,121,211 (September 9, 2000). Inventors: C. F. Stachew, W. D. Abraham, J. A. Supp, J. R. Shanklin, and G. D. Lamb.

- [320] "Viton Seal Compatible Dispersant and Lubricating Oil Composition Containing Same," U.S. Patent 5,188,745 (February 23, 1993). Inventors: C. A. Migdal and T. E. Nalesnick.
- [321] "Dibasic Acid Lubricating Oil Dispersant and Viton Seal Additives," U.S. Patent 4,663,064 (May 5, 1987). Inventors: T. E. Nalesnik and C. M. Cusano.
- [322] "Lubricating Oil Dispersant and Viton Seal Additives," U.S. Patent 4,636,322 (January 13, 1987). Inventor: T. E. Nalesnik.
- [323] "Dispersant Additives," U.S. Patent 6,127,322 (October 3, 2000). Inventors: R. M. Scott and R. W. Shaw.
- [324] "Method for Preparing Engine Seal Compatible Dispersant for Lubricating Oils Comprising Reacting Hydrocarbyl Substituted Dicarboxylic Compound with Aminoguanidine or Basic Salt Thereof," U.S. Patent 5,080,815 (January 14, 1992). Inventors: D. J. Fenoglio, P. R. Vettel, and D. W. Eggerding.
- [325] "Compositions for Control of Induction System Deposits," U.S. Patent 5,679,116 (October 21, 1997). Inventors: L. J. Cunningham, D. P. Hollrah, and A. M. Kulinowski.
- [326] "Deposit Control Additives and Fuel Compositions Containing the Same," U.S. Patent 5,334,228 (August 2, 1994). Inventors: H. Ashjian, M. P. Miller, D.-M. Shen, and M. M. Wu.
- [327] "Additive Formulation for Fuels Incorporating Ester Function Products and a Detergent-Dispersant," U.S. Patent 5,433,755 (July 18, 1995). Inventors: P. Mulard, Y. Labruyere, A. Forestiere, and R. Bregent.
- [328] "Gear and Transmission Lubricant Compositions of Improved Sludge-Dispersibility, Fluids Comprising the Same," U.S. Patent 5,665,685 (September 9, 1997). Inventor: S. Takigawa.
- [329] "Automatic Transmission Fluids and Additives Thereof," U.S. Patent 5,441,656 (August 15, 1995). Inventors: H. Otani and R. J. Hartley.
- [330] "Hydraulic Automatic Transmission Fluid with Superior Friction Performance," U.S. Patent 4,253,977 (March 3, 1981). Inventor: R. O'Halloran.
- [331] "Lubricating Oil Composition for Automatic Transmission," U.S. Patent 5,972,854 (October 26, 1999). Inventors: T. Ichihashi, H. Igarashi, J. Deshimaru, and T. Ikeda.
- [332] "Automatic Transmission Fluid Composition," U.S. Patent 5,958,286 (September 28, 1999). Inventor: M. Kitanaka.
- [333] "Automatic Transmission Fluids Having Enhanced Performance Capabilities," U.S. Patent 5,972,851 (October 26, 1999). Inventors: S. Srinivasan, D. W. Smith, and J. P. Sunne.
- [334] "Gear Oil Additive Concentrates and Lubricants Containing them," U.S. Patent 6,096,691 (August 1, 2000). Inventors: G. S. Conary and R. J. Hartley.
- [335] "Lubricating Oil Composition for High-speed Gears," U.S. Patent 5,756,429 (May 26, 1998). Inventor: T. Ichihashi.
- [336] "Hydraulic Fluids," U.S. Patent 5,767,045 (June 16, 1988). Inventor: H. T. Ryan.
- [337] "Use of Dispersant Additives as Process Antifoulants," U.S. Patent 5,368,777 (November 29, 1994). Inventor: D. R. Forester.
- [338] "Multifunctional Antifoulant Compositions," U.S. Patent 4,927,561 (May 22, 1990). Inventor: D. R. Forester.
- [339] "Multifunctional Antifoulant Compositions and Methods of Use Thereof," U.S. Patent 4,775,458 (October 4, 1988). Inventor: D. R. Forester.
- [340] "Process For Making Overbased Calcium Sulfonate Detergents Using Calcium Oxide and a Less Than Stoichiometric Amount of Water," U.S. Patent 6,015,778 (January 18, 2000). Inventors: A. J. Rolfes and S. E. Jaynes.
- [341] "Magnesium Low Rate Number Sulphonates," U.S. Patent 5,922,655 (July 13, 1999). Inventors: D. Moulin, J. A. Cleverley, and C. H. Bovington.
- [342] "Method of Preparing Overbased Barium Sulfonates," U.S. Patent 3,959,164 (May 25, 1976). Inventor: A. R. Sabol.
- [343] "Overbased Alkali Metal Sulfonates," U.S. Patent 4,867,891 (September 19, 1989). Inventor: M. W. Hunt.
- [344] "Metal Phenates," U.S. Patent 4,221,673 (September 9, 1980). Inventors: R. Robson, B. Swinney, and R. D. Tack.
- [345] "Preparation of Overbased Magnesium Phenates," U.S. Patent 4,435,301 (March 6, 1984). Inventors: C. G. Brannen and M. W. Hunt.
- [346] "Process for the Preparation of Sulfurized Overbased Phenate Detergents," U.S. Patent 4,973,411 (November 27, 1990). Inventors: T. C. Jao, C. K. Esche, E. D. Black, and R. H. Jenkins Jr.
- [347] "Methods for Preparing Group II Metal Overbased Sulfurized Alkylphenols," U.S. Patent 4,971,710 (November 20, 1990). Inventor: T. V. Liston.
- [348] "Production of Overbased Metal Phenates," U.S. Patent 4,104,180 (August 1, 1978). Inventors: V. C. E. Burnop.
- [349] "Method of Preparing Overbased Lubricating Oil Additives," U.S. Patent 4,057,504 (November 8, 1977). Inventors: M. Shiga, K. Hirano, and M. Matsushita.
- [350] "Recovery of Overbased Alkaline Earth Metal Additives from Centrifugates," U.S. Patent 4,910,334 (March 20, 1990). Inventors: F. A. Stuart and W. A. Tyson, Jr.
- [351] "Process for Preparing Overbased Naphthenic Micronutrient Compositions," U.S. Patent 4,243,676 (January 6, 1981). Inventor: W. R. Ali.
- [352] "Process for Overbased Petroleum Oxidate," U.S. Patent 5,013,463 (May 7, 1991). Inventor: F. J. Slama.
- [353] "Preparation of Basic Salt," U.S. Patent 4,810,398 (March 7, 1989). Inventors: E. M. G. A. Van Kruchten and R. R. Van Well.
- [354] Weamer, G. L., "Additives—A Way to Quality in Motor Oils," *Petroleum Refiner*, 38, 1959, pp. 215–219.
- [355] "Metal Salts of Organic Acids of Phosphorus," U.S. Patent 2,785,128 (March 12, 1957). Inventor: A. H. Popkin.
- [356] "Preparation of Overbased Magnesium Sulfonates," U.S. Patent 4,148,740 (April 10, 1979). Inventors: V. J. Cease and G. R. Kirk.
- [357] Price, C. C., "The Alkylation of Aromatic Compounds by the Friedel-Crafts Method," *Organic Reactions*, John Wiley and Sons, Inc., Vol. III, Chapter 1, 1946, pp. 1–82.
- [358] "Alkylation of Aromatics with Olefins in the Presence of an Alumina Catalyst," U.S. Patent 4,219,690 (August 26, 1980). Inventor: S. M. Kovach.
- [359] "Process and System for Alkylation of Aromatic Compounds," U.S. Patent 5,770,782 (June 23, 1998). Inventors: J. F. Knifton, P. R. Anantaneni, and M. Stockton.
- [360] Olah, G. A., *Friedel-Crafts and Related Reactions*, Interscience-Wiley Publishers, Vol. 2, 1964.
- [361] "Aromatic Alkylation," U.S. Patent 2,754,341 (July 10, 1956). Inventor: E. V. Kirkland.
- [362] "Process for the Production of Light Alpha Olefins by Oligomerization of Ethylene," U.S. Patent 5,345,023 (September 6, 1994). Inventors: Y. Chauvin, D. Commereuc, F. Hugues, H. Olivier, and L. Saussine.

- [363] "Process for the Conversion of Ethylene into Light Alpha Olefins with the Use of Additives Based on Quaternary Ammonium Salts," U.S. Patent 5,817,905 (October 6, 1998). Inventors: D. Commereuc, Y. Glaize, F. Hugues, P. Panzarella, and L. Saussine.
- [364] "Oligomerization Reaction System," U.S. Patent 4,020,121 (April 26, 1977). Inventors: A. T. Kister, and E. Lutz.
- [365] "Continuous Manufacturing Process for Alpha-olefins," U.S. Patent 6,555,723, April 29, 2003. Inventor: R. S. Schiffino.
- [366] "Manufacture of Alpha-olefins," U.S. Patent 6,103,946 (August 15, 2000). Inventors: M. S. Brookhart III and B. L. Small.
- [367] "Process for Producing High Vinylidene Polyisobutylene," U.S. Patent 6,683,138 (January 27, 2004). Inventors: E. C. Baxter III, G. Valdez, C. Lobue, and T. Lowry.
- [368] "Cationic Polymerization of 1-olefins," U.S. Patent 4,605,808 (August 12, 1986). Inventor: J. R. Samson.
- [369] "Aromatics Alkylation Process," U.S. Patent 5,191,135 (March 2, 1993). Inventors: F. G. Dwyer and Q. N. Lee.
- [370] Suter, C. M., and Weston, A. W., "Direct Sulfonation of Aromatic Hydrocarbons and Their Halogen Derivatives," *Organic Reactions*, John Wiley and Sons, Inc., Vol. 3, Chapter 4, 1946, pp. 141–197.
- [371] "Conversion of Sulfonic Acids into a Hydrocarbon Oil of Superior Oxidation Stability," U.S. Patent 4,188,500 (February 12, 1980). Inventors: D. S. Bosniack and P. F. Korbach. See the "Background of Invention" portion of the patent.
- [372] "Verfahren zur Herstellung von Sulfonsauren," DRP 735096, 1940. Inventors: C. Platz and K. Schimmelsschmidt.
- [373] "Reaction of Petroleum Oils with Sulfur Dioxide and Chlorine," U.S. Patent 2,263,312 (November 18, 1941). Inventor: C. F. Reed.
- [374] "Fatty Acids," <http://www.cyberlipid.org/fa/acid0001.htm#3>.
- [375] "Lubricating Oil Compositions Containing Saligenin Derivatives," U.S. Patent 6,310,011 (October 30, 2001). Inventors: J. L. Karn, J. A. Kocsis, L. E. King, P. E. Adams, and V. A. Notaro.
- [376] "Oil Formulations Containing Overbased Multi-functional Additive," U.S. Patent 4,954,273 (September 4, 1990). Inventors: R. A. Denis and F. W. Koch.
- [377] "Lubricating Oil Compositions Containing a Polyoxyalkylene Carboxylic Acid Salt Additive," U.S. Patent 5,250,203 (October 5, 1993). Inventors: R. A. Denis and F. W. Koch.
- [378] "Carboxylation with Carbon Dioxide. Kolbe-Schmitt Reaction," *Advanced Organic Chemistry, Reactions, Mechanisms, and Structure* by J. March, 4th ed., Chapter 11 on Aromatic Electrophilic Substitution, Section 1-20, Wiley-Interscience Publication, 1992, pp. 546–547.
- [379] "Additives for Lubricating Oils and Processes for Producing Them," U.S. Patent 5,089,158 (February 18, 1992). Inventors: E. M. G. A. Van Kruchten and G. W. J. Heimerikx.
- [380] "Phosphorus Pentasulfide," http://en.wikipedia.org/wiki/Phosphorus_pentasulfide
- [381] Huang, N. Z., "Overbased Products Using Non-ionic Substrates—Chemistry and Properties," *Presented at the Symposium on Recent Advances in the Chemistry of Lubricant Additives, Division of Petroleum Chemistry, 218 National Meeting of the American Chemical Society, New Orleans, LA, August 22–26, 1999*.
- [382] "Non-conventional Overbased Materials," U.S. Patent 5,556,569 (September 17, 1996). Inventor: N. Z. Huang.
- [383] "Metal Complexes and Methods of Making Same," U.S. Patent 2,777,874 (January 15, 1957). Inventors: P. A. Ass-eff, T. W. Mastin, and A. Rhodes.
- [384] "Metal-containing Lubricant Compositions," U.S. Patent 4,767,551 (August 30, 1988). Inventors: M. W. Hunt and S. Kennedy.
- [385] "Process for Overbasing via Metal Borate Formation," U.S. Patent 6,090,757 (July 18, 2000). Inventor: T. F. Steckel.
- [386] "Method of Preparation of Superbased Salts," U.S. Patent 2,695,910 (November 30, 1954). Inventors: P. A. Ass-eff, T. W. Mastin, and A. Rhodes.
- [387] "Sulfurized Overbased Compositions," U.S. Patent 5,484,542 (January 16, 1996). Inventors: J. M. Cahoon, J. L. Karn, N. Z. Huang, and J. P. Roski.
- [388] "Process for Overbasing via Metal Borate Formation," U.S. Patent 5,064,545 (November 12, 1991). Inventor: T. F. Steckel.
- [389] "Borated Basic Metal Salt and Lubricating Oil Composition," U.S. Patent 4,539,126 (September 3, 1985). Inventors: J. J. Bleeker, M. Booth, M. G. F. M. van Grieken, W. J. Krijnen, and G. D. van Wijngaarden.
- [390] "Overbased Carboxylate Gels," U.S. Patent 5,919,741 (July 6, 1999). Inventors: S. E. Jaynes and W. R. Sweet.
- [391] "Mixed Carboxylate Overbased Gels," U.S. Patent 5,401,424 (March 28, 1995). Inventors: J. N. Vinci and W. R. Sweet.
- [392] "Calcium Containing Micellar Complexes," U.S. Patent 3,766,067 (October 16, 1973). Inventor: R. L. McMillen.
- [393] "Magnesium Overbasing Process," U.S. Patent 5,173,203 (December 22, 1992). Inventors: W. P. Nichols and J. L. Karn.
- [394] "Basic Alkali Metal Sulfonate Dispersions, Process for Their Preparation, and Lubricants Containing Same," U.S. Patent 5,037,565 (August 6, 1991). Inventor: L. E. King.
- [395] "Compounds Useful as Detergent Additives for Lubricants and Lubricating Compositions," U.S. Patent 5,021,174 (June 4, 1991). Inventors: P. Koch and A. Di Serio.
