

# Subject Index

## A

Adsorption isotherm, 95  
 Airborne releases, 35  
 Air/water exchange, 7  
 Ambient levels, 7  
 ASTM D 5116-90, 77  
 ASTM E 981-84, 77

## B

Background level, 127  
 Bentonite, 95  
 Bioassay, 77  
 Biodegradation, pre-analysis holding times, 181  
 Biological degradation, 119  
 Brazil, emergency remedial action program, 219

## C

Characterization, on-site soil gas analysis, 203  
 Chemdat7, 147  
 Chemical waste landfill, on-site soil gas analysis, 203  
 Chlorinated hydrocarbons, emergency remedial action program, 219  
 Chromatograms, single-ion, identification and quantification of VOCs, 127  
 Conceptual model, 259  
 Confined double-compartment method, 245  
 Contamination, on-site soil gas analysis, 203  
 Costs, lower, 259

## D

Dense nonaqueous phase liquid, 203  
 emergency remedial action program, 219  
 Desorption isotherm, 95  
 1,2-Dichloromethane, 219  
 1,2-Dichloropropane, 219  
 Dual vacuum extraction, 272

## E

Ecoprobe, 192  
 Emergency response, 219  
 Emissions, 7  
 estimation, 147

indoor, 55, 66

Environment, measurement of very low concentrations, 139

Ethyl benzene, in sewage sludge-amended soil, 119

Exposure, vapor-phase organic compounds, 66

Extraction wells, 219

## F

Factor analysis, 66

Field screening, 259

Field study, sewage sludge-amended soil, 119

Flame ionization detector, identification and quantification of VOCs, 127

Flux chamber, flow-through, 147

## G

Gas chromatograph/mass spectrometer, identification and quantification of VOCs, 127

Geomembranes, permeation through, 245

Gravimetric method, modified, measuring rates of vapor adsorption and desorption on soils, 95

Ground tires, sorption capacity, 237

Ground water

emergency remedial action program, 219

remediation, dual vacuum extraction, 272

site characterization, 203

soil gas technique, 192

## H

Half-lives, 119

Halogenated organics, solid-phase microextraction, 139

Holding time, 181

Hydraulic functions, soil, 105

## I

Indoor air, identification and quantification of VOCs, 127

Indoor emissions, sensory irritation, 77

Investigations, remedial, 259

**L**

Landfill, geomembranes, 245  
 Loss processes, abiotic, 119

**M**

Methanol extraction, 156  
 Mice, sensory irritation, VOC exposure, 77  
 Montmorillonite, 95  
 Multimedia distribution, 7  
 Multipathway exposure, 7  
 Multiphase flow, 105  
 Multistep outflow method, 105

**N**

Nonaqueous phase liquid, pressure and  
 saturation in porous media, 105

**O**

Off-gas, 237

**P**

Paleo-channel, 219  
 Partition coefficient, 237  
 Performance evaluation materials, 156  
 Permeability function, 105  
 Permeability test, 245  
 Permeation, through geomembranes, 245  
 Petroleum pollution, soil gas technique, 192  
 Photoionization detector, 192  
 Pollution  
   prevention, 35  
   soil gas technique, 192  
 Polyethylene  
   high-density, 245  
   very-low-density, 245  
 Polyvinyl chloride, 245  
 Presumptive remedy, 259

**Q**

Quality assurance samples, 156

**R**

Refinery  
   emission estimation, 147  
   VOC release inventory, 35  
 Release inventory, 35  
 Remediation, 259  
   dual vacuum extraction, 272

Residential emissions, Canadian, 55, 66  
 Retention function, 105

**S**

Sample collection, 170  
 Sample handling, 170  
 Saturation paths, 105  
 Scaling, 105  
 Sensory irritation, mice, VOC exposure, 77  
 Sewage sludge, amended soil, 119  
 Silica fiber, 139  
 Soil  
   dry VOC-fortified, 156  
   fortified, pre-analysis holding times, 181  
   hydraulic functions, 105  
   remediation, dual vacuum extraction, 272  
   sewage sludge-amended, 119  
   vapor adsorption and desorption,  
     gravimetric method, 95  
 Soil gas, 192  
   on-site analysis, 203  
 Soil samples  
   effect of collection and handling  
     practices, 170  
   pre-analysis holding times, 181  
 Soil/solid matrices, 156  
 Soil transport, 7  
 Soil vapor extraction, 272  
 Solid-phase microextraction, 139  
 Sorption capacity, ground tires, 237  
 Source, 7  
   indoor, 55, 66  
   reduction efforts, 35  
 STERDI, 259  
 Surface impoundment, emission estimation,  
   147  
 SW-846 Method 5030A, 156

**T**

Temperature, indoor emissions and, 77  
 Toluene  
   adsorption and desorption on soils,  
     gravimetric method, 95  
   in sewage sludge-amended soil, 119  
 Transport, 245  
 1,2,3-Trichloropropane, 219

**V**

Vapor, adsorption and desorption on soils,  
   gravimetric method, 95  
 Vapor-phase organic compounds  
   in residences, 66

sorption capacity of ground tires, 237  
Volatilization, 7, 119  
losses, 156

**W**

Waste water treatment units, emission  
estimation, 147

Water vapor, adsorption and desorption on  
soils, gravimetric method, 95  
Wet deposition, 7

**X**

Xylenes, in sewage sludge-amended soil,  
119
