## **Foreword**

This Symposium on Gray, Ductile, and Malleable Iron Castings—Current Capabilities was presented under joint ASTM–ASM auspices during the 1968 American Society for Metals Materials Engineering Exposition and Congress, in Detroit, Mich., 15 October 1968. The symposium was organized by a task force of ASTM Committee A-4 on Iron Castings with H. J. Heine, technical director, Malleable Founders Society, Cleveland, Ohio, as chairman.

**Contents**

Introduction . . . . . 1

Gray Iron—A Unique Engineering Material—D. E. KRAUSE. . . . . 3

Ductile Iron—Our Most Versatile Ferrous Casting Material—H. E.  
HENDERSON . . . . . 29

Malleable Iron—H. J. HEINE . . . . . 54

Field Testing of Components—D. R. OLBERTS AND L. E. TUCKER . . . . 76

High Factors of Safety or Usable Design Strengths—J. B. CAINE . . . . 87
