FOREWORD

These six papers, reviewing the present status of the testing of petroleum products and lubricants and suggesting some further needs in the field, were prepared upon the invitation of the Sectional Committee on Petroleum Products and Lubricants (A.S.A. Project: Z11) for the information of its members. The primary purpose was to help the committee in carrying out its function as a correlating and reviewing body in the field of specifications, methods of test, and nomenclature relating to petroleum products and lubricants. The papers have been published in this booklet to make them available to all who may find them of interest and value.

The opinions expressed in the papers are those of the individual authors. They have not been endorsed by Sectional Committee Z11 nor by the Society.

CONTENTS

	PAGE
Lubricating Oils—J. C. Geniesse	1
Petroleum Lubricating Greases—Martin B. Chittick	11
Gasoline—T. A. Boyd	19
Diesel Fuels—T. B. Rendel	29
Fuel Oils (Other than Diesel)—H. V. Hume	38
The Status of Research on Fuels and Lubricating Oils for Spark-Ignition Aircraft Engines—S. D. Heron	44
