#### **Photocopy Rights**

Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the AMERICAN SOCIETY FOR TESTING AND MATERIALS for users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$2.50 per copy, plus \$0.50 per page is paid directly to CCC, 27 Congress St., Salem, MA 01970; (508) 744-3350. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is 0-8031-1440-0/92 \$2.50 + .50.

#### **Peer Review Policy**

Each paper published in this volume was evaluated by three peer reviewers. The authors addressed all of the reviewers' comments to the satisfaction of both the technical editor(s) and the ASTM Committee on Publications.

The quality of the papers in this publication reflects not only the obvious efforts of the authors and the technical editor(s), but also the work of these peer reviewers. The ASTM Committee on Publications acknowledges with appreciation their dedication and contribution to time and effort on behalf of ASTM.

# Foreword

The Twenty-Second National Symposium on Fracture Mechanics was held on 26–28 June 1990 in Atlanta, Georgia. ASTM Committee E24 on Fracture Testing was the sponsor. The Executive Organizing Committee responsible for the organization of the meeting was composed of H. A. Ernst, Georgia Institute of Technology, who served as the symposium chairman, and the following vice-chairman: S. D. Antolovich, Georgia Institute of Technology; S. N. Atluri, Georgia Institute of Technology; J. S. Epstein, Idaho National Engineering Laboratory; D. L. McDowell, Georgia Institute of Technology; J. C. Newman, Jr., NASA Langley Research Center; I. S. Raju, North Carolina State A&T University; and A. Saxena, Georgia Institute of Technology. The proceedings have been divided into two volumes. H. A. Ernst, A. Saxena, and D. L. McDowell served as editors of Volume I and S. N. Atluri, J. C. Newman, Jr., I. S. Raju, and J. S. Epstein served as editors of Volume II.

# Contents

<b>Introduction</b>	<b>1</b>
---------------------	----------

## ELASTIC FRACTURE MECHANICS AND APPLICATIONS

<b>Experimental Determination of Fracture Parameters in Three-Dimensional Problems—C. W. SMITH</b>	<b>5</b>
<b>Crack-Mouth Displacements for Semelliptical Surface Cracks Subjected to Remote Tension and Bending Loads—I. S. RAJU, J. C. NEWMAN, JR., AND S. N. ATLURI</b>	<b>19</b>
<b>Stress-Intensity Factors for Long Axial Outer Surface Cracks in Large <math>R/T</math> Pipes—R. B. STONESIFER, F. W. BRUST, AND B. N. LEIS</b>	<b>29</b>
<b>An Inverse Method for the Calculation of Through-Thickness Fatigue Crack Closure Behavior—D. S. DAWICKE, K. N. SHIVAKUMAR, J. C. NEWMAN, JR., AND A. F. GRANDT, JR.</b>	<b>46</b>
<b>ASTM E 1304, The New Standard Test for Plane-Strain (Chevron-Notched) Fracture Toughness: Usage of Test Results—L. M. BARKER</b>	<b>58</b>
<b>Comparison of Mixed-Mode Stress-Intensity Factors Obtained Through Displacement Correlation, <math>J</math>-Integral Formulation, and Modified Crack-Closure Integral—T. N. BITTENCOURT, A. BARRY, AND A. R. INGRAFFEA</b>	<b>69</b>
<b>Application of the Weight-Functions Method to Three-Dimensional Cracks Under General Stress Gradients—S. N. MALIK</b>	<b>83</b>
<b>The Application of Line Spring Fracture Mechanics Methods to the Design of Complex Welded Structures—D. RITCHIE, C. W. M. VOERMANS, M. BELL, AND J. DELANGE</b>	<b>113</b>

## NONLINEAR FRACTURE MECHANICS AND APPLICATIONS

<b>Crack-Tip Displacement Fields and <math>J_R</math>-Curves of Four Aluminum Alloys—M. S. DADKHAH, A. S. KOBAYASHI, AND W. L. MORRIS</b>	<b>135</b>
<b>Application of the Hybrid Finite Element Method to Aircraft Repairs—P. TONG, R. GREIF, AND LI CHEN</b>	<b>154</b>
<b>A Hybrid Numerical-Experimental Method for Caustic Measurements of the <math>T^*</math>-Integral—T. NISHIOKA, T. FUJIMOTO, AND K. SAKAKURA</b>	<b>170</b>

<b>Three-Dimensional Elastic-Plastic Analysis of Small Circumferential Surface Cracks in Pipes Subjected to Bending Load—C. FRANCO AND P. GILLES</b>	183
<b>Elastic-Plastic Crack-Tip Fields Under History Dependent Loading—F. W. BRUST, J. AHMAD, AND S. NABOULSI</b>	206
<b>Experimental Study of Near-Crack-Tip Deformation Fields—F.-P. CHIANG, S. LI, AND Y. Y. WANG</b>	225
<b>An Engineering Approach for Crack-Growth Analysis of 2024-T351 Aluminum Alloy—I. GU</b>	246
<b>Advanced Fracture Mechanics Analyses of the Service Performance of Polyethylene Gas Distribution Piping Systems—P. E. O'DONOGHUE, M. F. KANNINEN, C. F. POPELAR, AND C. H. POPELAR</b>	257
<b>Three-Dimensional Analysis of Thermoelastic Fracture Problems—W. H. CHEN AND C. C. HUANG</b>	274

#### NOVEL MATHEMATICAL AND COMPUTATIONAL METHODS

<b>Analysis of Growing Ductile Cracks Using Computer Image Processing—G. YAGAWA, S. YOSHIMURA, A. YOSHIOKA, AND C.-R. PYO</b>	289
Discussion	313
<b>Traction Boundary Integral Equation (BIE) Formulations and Applications to Nonplanar and Multiple Cracks—T. A. CRUSE AND G. NOVATI</b>	314
<b>Evaluation of Three-Dimensional Singularities by the Finite Element Iterative Method (FEIM)—R. S. BARSOUM AND T.-K. CHEN</b>	333
<b>An Analytical Solution for an Elliptical Crack in a Flat Plate Subjected to Arbitrary Loading—A.-Y. KUO, S. SHVARTS, AND R. B. STONESIFER</b>	347
<b>Application of Micromechanical Models to the Prediction of Ductile Fracture—D.-Z. SUN, R. KIENZLER, B. VOSS, AND W. SCHMITT</b>	368

#### COMPOSITES MATERIALS

<b>Matrix Cracks and Interphase Failure in Transversely Loaded Fiber Composites—H. ZHU AND J. D. ACHENBACH</b>	381
<b>Dynamic Stress-Intensity Factors for Interface Cracks in Layered Media—M. BOUDEN AND S. K. DATTA</b>	395
<b>Probabilistic Fracture Models for Predicting the Strength of Notched Composites—M.-C. CHENG AND K. Y. LIN</b>	410

<b>Analysis of Unidirectional and Cross-Ply Laminates Under Torsion Loading—J. LI AND E. A. ARMANIOS</b>	<b>421</b>
--	------------
