# Foreword

This publication, *Slurry Erosion: Uses, Applications, and Test Methods*, contains papers presented at the international symposium of the same name held in Denver, Colorado on 26–27 June 1984. The symposium was sponsored by ASTM Committee G-2 on Erosion and Wear, the National Association of Corrosion Engineers, the Slurry Transportation Association (now the Slurry Technology Association), and the American Society for Metals. John E. Miller, White Rock Engineering, and Frederick Schmidt, E.I. du Pont de Nemours & Co., presided as symposium chairmen and were coeditors of this publication.

## A Note of Appreciation to Reviewers

The quality of the papers that appear in this publication reflects not only the obvious efforts of the authors but also the unheralded, though essential, work of the reviewers. On behalf of ASTM we acknowledge with appreciation their dedication to high professional standards and their sacrifice of time and effort.
