Subject Index

A

Adult ingestion, 129
Aquatic environments, soil contamination, 288
Aromatic hydrocarbons, polycyclic, 32, 95
Aromatic hydrocarbons, polynuclear, 18, 50
Automobile assembly plant, 32

B

Baseline assessments, 50, 81, 138, 205, 245, 277
Bayesian updating, 260
Bioassays
  animal, 95
  plant, 95
Biokinetics, 151, 193, 245
Biological test methods, 288
Biota effects, 205
Blood lead level, 151, 193, 245

C

Carcinogenic risk, 129
Characterization, site, 3, 18, 32, 50, 65, 81
Chemdat6, 113
Chemical parameters
  average concentrations, 175
  concentration, 32, 129, 167, 231
  detection, 50
  frequency of occurrence, 50, 81
  levels, 50, 138
  property estimation, 205
  reference concentrations, 167
  subsets, 277
Chemical property estimation methods, 205
Chemicals of concern, 81, 277
  identification, 50
  isolating, 277
  reference dose, 193, 217
Childhood ingestion, 129
Cleanup levels, 151
Cleanup targets, 309
Concentrations, chemical, 32, 129, 167, 175, 231
Concentration toxicity screening procedure, 81
Cumulative density function, 260, 309

D

Database management, 18
Degradation products, chemical, 50
Density function, cumulative, 260
Design, remedial investigation, 175
Desorption tests, 95
Dioxins, 50
Dishwasher, water contamination, 138
Displacement, miscible, 65
Distribution, data, 32
Dose-response relationship, 231

E

Ecological risk, 95, 288
Economic risk, 260
Endpoints, 95
Environmental Sample Expert System (ESES), 3
Estimation methods, chemical property, 205
Expert systems, 3
Exposure assessment, 175, 231
Exposure calculations, 32
Exposure modeling, 151

F

Field guide, site/soil description and analysis, 3
Field screening procedures
  soils applications, 18
Fluoride, 217
Fugitive emissions, 113

Copyright © 1992 by ASTM International www.astm.org

G

Gridded sampling, 175
Ground water
  contamination, 138
  fluoride in, 217
  lead in, 245
  nitrates in, 217

H

Health Effects Assessment Summary Tables (HEAST), 217
Hydrocarbon-contaminated soils, 113

I

Indicator chemicals, selection, 81
Indicator score method, 277
Ingestion, soil, 128
Inhalation, 138
Integrated Risk Information System (IRIS), 217

K

Knowledge frames, site/soil characteristics, 3

L

Lead, 151, 193, 245

M

Maximum contaminant level, 138
Metal contamination, 3, 18, 32, 288
  lead, 151, 193, 245
Mining, 288
Mobility, 81
  coefficient, 65
Models and modeling
  biokinetic, integrated uptake, 151, 193, 245
  concentrations, 231
  solute transport, 65
  transport, 113
  transport/transfer, 205
Monte Carlo, 260, 309

N

New Jersey Department of Environmental Protection, 309
Nitrates, 217

O

Oak Ridge Reservation, 167
  Waste Area Grouping (WAG) 6, 231

P

Phenols, 18
Piston flow, 65
Pollutant Hazard Assessment System (PHAS20), 205
Polycyclic aromatic hydrocarbons, 32, 95
Polynuclear aromatic hydrocarbons, 18, 50
Preliminary pollutant limit value approach, 205
Prescreening procedure, 81
Probabilistic sensitivity analysis, 309
Probability approach, risk assessment, 260
Probability density functions, 309
Probability plots, 32

R

Radionuclides, 231
Reference concentrations, 167
Reference dose, 193, 217
Refinery site, 18
Riparian wetlands, 288

S

Sampling, 18
  strategies, 175
Screening procedures
  field, 18
  prescreening, 81
  soil concentrations, 129

Shower, water contamination, 138
Site average concentrations, 175
Site characterization, 3, 18, 32, 50, 65, 81, 217
Solute concentration distributions, 65

T

Tentatively identified compounds (TICs), 50
TETrans, 65
Time-weighted average intake, 151
Trace element transport (TETrans), 65
Transport, contaminant, 65, 113
Transport/transfer models, 205

U

UBK model, 151, 193
Upper confidence limit, 175
Uptake biokinetic model, 151, 193, 245
U.S. Army
  Biomedical Research and Development Laboratory, 205
U.S. Department of Energy
  Oak Ridge Reservation, 167
U.S. Environmental Protection Agency, 3, 50, 81, 217
  Health Effects Assessment Summary Tables (HEAST), 217
  Integrated Risk Information System (IRIS), 217
  integrated uptake/biokinetic model, 151, 193, 245
  National Priorities List, 81, 113, 167
  target risk range, 231

V

Vadose zone, 65
Volatile organic compounds, 18, 138

W

WAG 6, 231
Water contamination, 138, 217, 245
Wetlands, 288
