## FOREWORD

---

The papers and discussions in the Symposium on Consolidation Testing of Soils were presented at the Second Session of the Fifty-fourth Annual Meeting of the American Society for Testing Materials held in Atlantic City, N. J., June 18, 1951. Mr. Donald M. Burmister of Columbia University presided over this Session. This symposium was sponsored by Subcommittee R-5 on Structural Properties of Soils of Committee D-18 on Soils for Engineering Purposes.

THIS PUBLICATION is one of many issued by the American Society for Testing Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the A.S.T.M. technical committees, or compilations of data developed in special Society groups with many organizations co-operating. A list of A.S.T.M. publications and information on the work of the Society will be furnished on request.
