

## Subject Index

### A

Acetylene, 243  
 Adiabatic compression, 23  
 Aerospace industry, 81  
 Aircraft engines, 86  
 Alloy combustion, 57  
 Aluminum, 69, 107, 128  
 American Red Cross, 233  
 ASTM Committee G-4 on  
   Compatibility and  
   Sensitivity of Materials in  
   Oxygen-Enriched  
   Atmospheres, 1  
 ASTM standards  
   G 4, 107

### B

Beryllium, 86  
 Breathing air devices, 184  
 Burn-out testing, 11  
 Burn resistance, 86

### C

CEN, 23  
 Chlorinated solvents, 195  
 Chlorofluorocarbon, 195  
 Cleaning effectiveness factor,  
   195  
 Cleaning, laser, 222  
 Combustion  
   alloy, 57  
   heat of, 152  
   metals, 107  
   oxygen-acetylene, 243  
   propagation, 128  
   promoted, 57, 69, 100, 107,  
     184  
   threshold pressures, 100  
   titanium and alloys, 81  
 Composites, 152, 168  
 Computer program,  
   oxygen-acetylene  
   combustion, 243

Cone calorimeter, 152  
 Configurational testing, 168  
 Contamination control, 222  
 Copper, 107  
 Corrosion, 195  
   coupon test, ASTM G 4, 107

### D

Degreasers, non-ozone, 195  
 Design principles  
   gaseous oxygen system, for  
     High Heat Flux  
     Facility, 36  
   liquid oxygen system, for  
     High Heat Flux  
     Facility, 36  
 Divers Alert Network, 233

### E

Education, oxygen-enriched  
   atmospheres, 1  
 Elastomeric materials, 11  
 Electronic equipment, 168  
 Epoxy/fiberglass, 152, 168

### F

Flame propagation, 168  
   circuit board orientation  
     effects, 168  
 Flame spread, upward, 152  
 Flammability, 100, 107, 4  
   aluminum, 128  
   electronic equipment, 168  
   metals, 69  
   test system, 57  
 Flashback, 243  
 Flow velocities, for flame  
   propagation, 168  
 Fluorine, 107  
 Food and Drug Administration,  
   233  
 Fuel/coolant interaction, 128

**H**

Heat release rate, 152  
 High Heat Flux Facility, 36  
 Hydraulic valve, 23  
 Hydrocarbon, 195

**I**

Ignition, 69  
     cone calorimeter tests, 152  
     laser, 86  
     metals, 107  
     sources, 143  
     testing, frictional, 81  
     titanium and alloys, 81  
     vs. mechanical failure, 11  
 Inhalation devices, 233  
 International Organization for  
     Standardization, 23

**K**

Kel-F 81, 143  
 Kinetic energy, 143

**L**

Laser cleaning, 222

**M**

Material flammability test  
     system, 57  
 Mechanical failure, vs. ignition,  
     11  
 Mechanical impact, 184  
 Medical oxygen administration,  
     233  
 Metal combustion, 57  
 Metals, 1, 86  
     aluminum, 69, 107, 128  
     nickel, 107  
     promoted combustion, 57, 69,  
         100, 107  
     steel, 107, 184  
     titanium, 69, 81, 86  
 Monel, 107

**N**

National Aeronautics and Space  
     Administration, 36, 81,  
         168, 243  
 National Aerospace Plane, 36  
 National Institute of Occupational  
     Safety and Health, 184  
 National Safety Council, 233  
 Nickel, 107  
 Niobium, 69  
 Nitrogen trifluoride, 107  
 Non-ozone depleting agent, 195

**O**

Occupational Safety and Health  
     Administration, 233  
 Oxygen-acetylene cutting torch,  
     243  
 Oxygen index, 69

**P**

Particle impact ignition, 143  
 Piezoelectric pressure  
     transducers, 243  
 Piping, 36  
 Pneumatic impact, 23  
 Polymers, 143  
 Pressure, 11, 128  
     leaching operations, sulfide,  
         81  
     operating, 36  
     oxidation autoclaves, 81  
     threshold, combustion, 100  
 Promoted combustion, 57, 69,  
     100, 107, 184  
 Promoted ignition-combustion,  
     69

**R**

Ranking, wearability, 11  
 Residue, non-volatile, 195  
 Resuscitation devices, 233

**S**

SCBA, 184  
 Seal configuration tester, 11

Sealing materials, nonmetallic,  
23  
Solvents, chlorinated, 195  
Space suit applications, 81  
Standards  
ASTM, 1  
G 4, 107  
German, 23  
international, 23  
Steel  
carbon, 107  
stainless, 107, 184  
Stennis Space Center, 36  
Sulfuric acid environments, 81  
Surface preparation, 222

## T

Teflon, 143, 184  
Terpenes, 195  
Titanium, 69, 81, 86

Training programs, medical  
oxygen administration,  
233  
Transducers, piezoelectric  
pressure, 243  
Turbine engines, 86

## V

Valve, quick-opening, 23  
Vented containers, flammability,  
168  
Vespel SP-21, 143  
Viton, 184  
Viton A, 143

## W

Wearability, 11  
Welding equipment, 243
