

# Subject Index

## A

Acclimation, 48  
 Acetylcholinesterase, 253  
 Acidification, water, 62  
 Activated sludge, 228  
 Acute and partial chronic bioassays, 19,  
     146, 197  
 Acute toxicity, 213, 253, 555, 571  
*Allium cepa* L., 331  
 Algae toxicity, 555, 591  
 Allium test, 331  
 Allozyme analysis, 134  
*Alternanthera philoxeroides*, 346  
 Ames assay, 346  
 Ameliorating effect, 62  
 Amine toxicity, 591  
 6-Aminonicotinamide, 146  
 Anesthesia, 610  
 Anthraquinone, 689  
 Anticoagulant, marine, 381  
*Aplysia*, 289  
 Aquatic ecosystems, 88  
 Aquatic populations, 134, 263  
 Aquatic toxicity  
     algae, 591  
     chemicals, 523, 571  
     detection, 3  
     daphnids, 571  
     dissolved solids, 213  
     ecological risk assessment, 381  
     effects of copper, 19  
     marine antifoulant, 381  
     new industrial chemicals, 523  
     population analysis, 134  
     QSAR/SARs, 523, 610  
     test methods, 73, 197  
 Aquatic invertebrates, 555  
*Arabidopsis*, 317  
 Aroclor 1254, 184  
 Arsenic contamination, 681  
 Assay method for plant stress, 123  
 Atlantic salmon, effect of PCBs, 298  
 ATSDR (Interagency testing committee),  
     452

Avian field studies, 175  
 Avoidance-preference, 73

## B

Baseline toxicity, 610  
 Behavior, 48, 73  
 Bell W-3 tobacco, 317  
 Benthic organisms, 623, 663  
 Bioaccumulation, 510  
 Bioassays, 122, 623, 681  
 Biochemical effects of PCBs, 184  
 Bioconcentration testing, 688  
 Biodegradation, 103, 540  
 Biological effects, 175, 369  
 Biological indicator, 134  
 Biological responses, 369  
 Bioluminescence, 3  
 Biomarkers, 123–195  
     in aquatic systems, 134  
     in avian field studies, 175  
 Biomonitoring, 134, 317  
 Birds, 159  
 Bisbenzamide, 146  
 Body burden, 184  
 Botanical test systems, 331  
 Branched 4-nonylphenol, 688  
*Brassica*, 317  
 Butyl benzyl phthalate, 103

## C

Cadmium, contamination, 681  
 Carcinogens, 663  
 Cell health assay of water quality  
     (CHAWQ), 146  
 CEQ (Interagency testing committee), 452  
 CERCLA. *See* Comprehensive  
     environmental response  
     compensation and liability act.  
*Ceriodaphnia dubia*, 213, 240  
 Chaconine, 146  
 CHAWQ. *See* Cell health assay of water  
     quality.  
 Chemical testing (TSCA), 451, 688

Chemical waste discharges, 681  
 Chemicals  
   bioconcentration testing, 688  
   biological impacts, 369  
   chemical update system (CUS), 555  
   chronic toxicity, 240, 409  
   ecological risk assessment, 422  
   ecosystem impacts, 175, 422  
   effects on biological responses, 369  
   exposure, 422  
   inventory, 555  
   QSAR/SARs, 523, 571  
   regulation, 34, 523  
   risk assessment for environmental  
     toxicity, 331, 523  
   toxic effects, 409, 422  
   toxic substances control act (TSCA), 523  
   waste discharges, 681  
*Cheumatopsyche petiti*, 62  
 Chironomid deformities, 663  
 Chlorinated hydrocarbons, 159  
 Chlorophyll fluorescence, 122  
 Chromosome aberrations, 331  
 Chronic sediment bioassays, 623  
 Chronic toxicity, 197, 240, 253, 556, 571  
 Clams, 681  
 Coho salmon, 19  
 Communities, 88  
 Comprehensive environmental response  
   compensation and liability act, 34  
 Connecticut, 197  
 Connectivity indices, 591  
 Contaminants in aquatic systems, 48, 134  
 Contaminated sediments, 640  
 Copper contamination, 19, 88, 681  
 CPSC (Interagency testing committee), 452  
 CT-screen, 197  
 Cultured plant cells, 346  
*Cyperus esculentus*, 681  
 Cytochrome, 450, 184

## D

*Daphnia magna*, 213  
 Daphnids, toxicity, 591  
 Deformities, 663  
 Demographic models, 623  
 Detoxification, 346  
 Di-4-ANEPPS, 146  
 Dietary toxicity of parathion, 253  
 Dinoflagellates, 3  
 Dioxin test using chicken embryos, 159  
 DOC (Department of commerce)  
   (Interagency testing committee), 452

DOD (Department of defense)  
   (Interagency testing committee), 452  
 DOI (Department of the interior)  
   (Interagency testing committee), 452  
 DOT (Department of transportation)  
   (Interagency testing committee), 452  
 Dopamine, effects on nervous system, 289  
 Duckweed, 369

## E

Earthworms, 681  
 Ecological effects, 88, 381, 422  
 Ecological effects test guidelines, 688  
 Ecological indicators, 134  
 Ecological risk assessment, 422, 440  
 Ecosystems, 88, 175, 263  
 Ecosystems, experimental, 3–121  
 Ecotoxicology, 440  
 Effluent disposal, 510  
 Effluent toxicity  
   monitoring, 197, 213  
   wastewater treatment simulation, 228  
 Electrochromic dye-response to electrical  
   potential (Di-4-ANEPPS), 146  
 Effects, biological, 175  
 Elimination, 298  
 Embryo, 159  
 Empirical methods, 409  
 Endpoint criteria, 48, 73, 159  
 Environmental assessment, 555  
 Environmental conditions  
   chemical exposure, 422  
   contamination with PCBs, 184, 298  
   effect of toxicity, 3, 19  
   hazards, 422, 555  
   pollution monitoring, 317  
   risk assessment, 422  
   toxic substances control act (TSCA), 555  
 Environmental exposure modeling, 381,  
   422  
 Environmental fate, 103, 381, 523, 540  
 Environmental hazard assessment, 555,  
   571, 591  
 Environmental monitoring programs, 34,  
   523, 555  
 Environmental Protection Agency (EPA).  
   See U.S. Environmental Protection  
   Agency.  
 Environmental risk assessment, 381, 523  
 Environmental toxicology, 591  
 EPA. See U.S. Environmental Protection  
   Agency.  
 Escape reflexes, 263, 275

Experimental methods, 3, 409  
Exposure, 122, 175

## F-H

FDA (Food and drug administration)  
(Interagency testing committee), 452  
Federal insecticide, fungicide and  
rodenticide act, 34  
FETAX, 146  
Field studies, 175  
FIFRA. *See* Federal insecticide, fungicide  
and rodenticide act, 34  
Fish, toxicity tests, 275  
Fisheries biologists—practices, 409  
Fluorescence, as plant stress assay, 123,  
146  
Fluorescent dye, 146  
Fluvium, 73  
Forensic techniques, 409  
Frog embryo teratogenicity assay  
(FETAX), 146  
Functional redundancy, 88  
Genotoxicity, 331  
Giant axons, 263  
GLP. *See* Good laboratory practices.  
Good laboratory practices, 34  
Granular activated carbon, 240  
Great Lakes fisheries, 409  
Growth, 623  
Hatching success, effect of PCB exposure,  
298  
Hazard evaluation, 422, 555, 571, 591  
Hazard index, chemical toxicity, 422, 523,  
555  
Hazardous chemicals, 681  
Hazardous waste sites, monitoring, 317  
Heart, 159  
Heavy metal contamination, 3, 681  
Hepatic enzyme induction, 184  
High performance liquid chromatography,  
289  
Human exposure to PCBs, 184  
*Hyalomma azteca*, 640

## I-L

Impacts in aquatic systems—biological  
indicator, 134  
Indicators, actual/potential—fish and  
wildlife test methods, 409  
Industrial chemicals (QSAR/SARs), 523,  
571, 591  
Industrial organic chemicals, 555

Industrial wastewaters, 240  
Injury, fish and wildlife test methods, 409  
Interagency testing committee (ITC)  
test methods development, 688  
TSCA *Priority Testing List*, 451  
Invertebrates, 48, 663  
Invertebrate rhythms, 34  
Isothiazalone, 381  
Laboratory microcosms, 88, 103  
Laboratory practices  
quality assurance, 34  
wastewater treatment simulation, 228  
Larvae, 62  
Lead contamination, 681  
*Lemna gibba*, 369  
Life cycle assessment, i  
Limb, 159  
Liquid chromatography, 289  
Log P, 591  
Low pH, 62

## M-N

Mammalian toxicology, 610  
Marine anticoagulant, ecological risk  
assessment, 381  
Marine bioluminescence, 3  
Marine environment, 3, 381  
Mauthner escape response, 275  
Measurement, phytotoxicity, standards,  
362  
Medaka, 275  
Metal accumulation in dairy cows, 510  
Metals—contamination, 3, 19, 253, 681  
Methodology, 73, 197  
Microassays, 253  
Microcosms  
copper toxicity, 88  
laboratory  
use in predicting chemical fate, 103  
Microtox, 640  
Mideges, 688  
Milk, 510  
Mollusc nervous system, 289  
Monitoring, 34, 197, 253  
Mouse hepatic cytochromes P450, 184  
Multivariate analysis, 540  
Muscarinic receptors, 253  
Mutagen, 346  
Narcosis, 610  
National pollutant discharge elimination  
system, 34  
NCI (Interagency testing committee), 452  
Nervous system, mollusc, 289

- Neurochemical deficit, 289
- Neurotoxicity, 253, 263, 275
- New industrial chemicals, 523, 571
- Niagara river watershed, 663
- NIEHS (Interagency testing committee), 452
- NIOSH (National institute of occupational safety and health) (Interagency testing committee), 452
- Nitro-aromatic compounds, 346
- Nitro-polycyclic aromatic hydrocarbons (nitro-PAH), 346
- NLM (National library of medicine) (Interagency testing committee), 452
- NSF (National science foundation) (Interagency testing committee), 452
- Non-lethal toxic effects, 122
- NPDES. *See* National pollutant discharge elimination system.
- NTP (Interagency testing committee), 452
- Plant deactivation, 346
- Plant stress assay, 122
- Plants, 681
- Pollution, 34, 317
- Pollution prevention, 571
- Polychlorinated biphenyls, 184, 289, 298
- Polycyclic aromatic hydrocarbons (PAH), 369
- Population dynamics, 623
- Populations, terrestrial, 175
- Pore water, 640
- Pore-water extraction, 640
- Porous pots, 228
- Power plant effluents, 19
- Predator avoidance, 298
- Premanufacture notice (PMNs), 523, 540
- Priority Testing List*, TSCA section 4(e), 451
- Procedural standards, 440

## O-P

- Octamethylcyclotetrasiloxane, 688
- Octanol/water partition coefficient, 555
- Office of Pollution Prevention and Toxics (EPA-OPPT), 523–622
- Organotin, 663
- OSHA (Occupational safety and health administration) (Interagency testing committee), 452
- Oryzias latipes*, 275
- Oligochaetes, 263
- Onion test, 331
- Ontogeny, 298
- Optimum feed, 228
- Organophosphorus pesticides, 253
- PAH. *See* Polycyclic aromatic hydrocarbons.
- Parathion, 253
- PCBS. *See* Polychlorinated biphenyls.
- Peromyscus*, 253
- Pesticides
  - neurotoxicity, 253
  - regulation, 34
- pH, low, 62
- Photochemistry, 369
- Photosensitization, 369
- Photosynthesis, 122
- Phototaxis, 298
- Phytoplankton bioassays, 3
- PHYTOTOX (data base), 362
- Phytotoxicity, 362
- Plant biomonitoring, 317
- Plant cell culture, 346

## Q-S

- Quality assurance, 34
- Quantitative structure activity relationships (QSAR/SARs), 369, 523, 555, 571, 591, 610
- QSARs. *See* Quantitative structure activity relationships.
- RCRA. *See* Resource conservation and recovery act.
- Receptor binding assay, 253
- Reflexes, 263
- Regulatory programs, 34, 197, 213, 440
- Remediation, 681
- Reproduction, 623
- Resource conservation and recovery act, 34
- Restoration, 409
- Risk assessment, 331
- Risk assessment, 381–521
  - biodegradation, 540
  - chemical exposure, 422, 523
  - marine anticoagulant, 381
  - standards, 440
- Root growth, 331
- 6-aminonicotinamide, 146
- Salmo salar*, PCB exposure, 298
- Salmon—toxicity of copper, 19
- SAR/QSAR. *See* Quantitative structural activity relationships; Structural activity relationships.
- Scientifically defensible risk assessment standards, 440
- Screening tools (QSARs), 555
- Sea-Nine 211 Biocide, 381
- Sediment toxicology, 623, 721

Sediments, 48, 103, 623, 640, 688  
 Selenium contamination, 681  
 Serum, 510  
 Sewage disposal, 510  
 Sewage treatment, 197  
 Site remediation, 681  
 Sodium chloride, effect on water  
   acidification, 62  
 Soil contaminants, 681  
 Somite, 159  
 Spanned substituent space, 610  
 Species, toxicity data, 422  
 Standards, ecological risk assessment, 440  
 Standards, proposed units for measurement  
   of phytotoxicity, 362  
 Steelhead trout, 19  
 Storm drain effluent, 3  
 Stress responses, 88, 122, 175  
 Structural activity relationships (SAR/  
   QSARs), 523, 555, 571, 610  
 Structure/biodegradability relationships,  
   540  
 Sublethal toxicity, 298, 623  
 Sunlight, 369  
 Synthetic feed, 228

### T-V

Tadpoles, 688  
 TCDD (2,3,7,8-tetrachlorodibenzo-p-  
   dioxin, 159  
 Teratogens, 159, 663  
 Terrestrial and aquatic oligochaetes, 263  
 Terrestrial plants, 317  
 Terrestrial receptors, 253  
 Terrestrial wildlife, 422  
 Test methods, 3, 73, 159, 197, 409, 422,  
   688  
 Tetrabromobisphenol A, 688  
 Tiazole orange, 146  
 2,3,7,8-Tetrachlorodibenzo-p-dioxin  
   (TCDD), 159  
 Total dissolved solids (TDS) toxicity, 213  
 Tolerance, 62  
 Toxic effects, non-lethal, 122  
 Toxic substances, 409  
 Toxic substances control act (TSCA), 34,  
   409, 451, 523, 540, 571, 688  
 Toxicity  
   Atlantic salmon, 298  
   bioconcentration, 688  
   chemicals, 48, 88, 159, 409, 422, 571  
   chromosome aberrations, 331  
   detection, 3, 48, 197  
   effluent monitoring, 197, 213

  fish, tests, 275, 409  
   identification, 213  
   industrial wastewaters, 240  
   metal accumulation in dairy cows, 510  
   non-lethal, 122  
   of copper to salmon, 19  
   polycyclic aromatic hydrocarbons  
     (PAH), 369  
   QSARs, 610  
   reduction evaluation, 213, 240  
   regulation, 213, 440, 571  
   risk assessment, 422, 571  
   screening tests, 197, 571  
   testing methodology, 3, 48, 73, 159, 275  
   total dissolved solids (TDS), 213  
   wastewaters, 228, 240  
   water quality objectives, 409  
   wildlife, 409  
 Toxicity Identification Evaluation (TIE),  
   213  
 Toxicity Reduction Evaluation (TRE), 213  
 Toxicity Reference Value (TRV), 422  
 Toxicity tests, 640  
 Toxicology, aquatic, 3, 121  
   behavioral, 48  
   chemical effect on ecosystems, 88, 159,  
     409  
   ecological risk assessment, 381  
   frequency analysis, 134  
   testing, 73, 159, 381  
   water quality objectives, 409  
 Toxicology, regulation, 440  
 Toxins, 253  
*Tradescantia*, 317  
 Trichoptera: hydropsychidae, 62  
 Triethylenemelamine, 146  
 TSCA. *See* Toxic substance control act.  
 U.S. Environmental Protection Agency  
   (EPA), 34, 452  
 Units of measurement, 362  
 Uptake, 298  
 USDA (Department of agriculture)  
   (Interagency testing committee), 452  
 USEPA. *See* U.S. Environmental  
   Protection Agency
