

# Subject Index

## A

ACL  
   injury mechanism, 63  
   strain and quadriceps contraction, 94  
 Ankle, deflection during forward fall, 82  
 Anteromedial bundle, strain, 94  
 ASTM F 939-93, 107  
 Avalanche fatality, effects of training, 45

## B

Back country skiing, avalanche fatalities, 45  
 Backward fall, ACL injury, 63  
 Beginner areas, mitigating hazards, 35  
 Biomechanics, ACL injury, 63  
 Body temperature, deep, 50  
 Boot, design and ankle deflection, 82  
 Boot-induced anterior drawer, 63

## C

Colorado snowboarding injury study, 141  
 Colored lenses, effect on visual acuity and stereoscopic depth perception, 23

## D

Death risk, avalanche, effects of training, 45  
 Dynamic model, ankle deflection, 82

## E

EMG, 63

## F

Failure-to-release, tibial fractures and, 120  
 Fall line, 35  
 Femur fractures, epidemiological study, 158  
 Flexibility, warm-up and, 50  
 Forward fall, ankle deflection, snowboarding, 82

## H

Hazards, mitigating, 35  
 Heart rate, warm-up and, 50

## Helmets

snowboarding, 141  
 use and injury, 3

## I

### Injury prevention

  release binding for snowboards, 132  
   risk factors, 166  
   vision and, 11, 23

## K

### Knee injury

  ACL, 63  
   ACL strain and quadriceps contraction, 94  
   snowboarding, 141

## M

Movement control, 11, 23  
 Muscle activity, 63

## P

Posterolateral bundle, strain, 94

## Q

Quadriceps, contraction and ACL strain, 94

## R

Reaction time, reduced visual acuity and, 11, 23  
 Release, inadvertent, tibial fractures and, 120  
 Release binding, snowboards, 132  
 Retention settings  
   comparison of needed and recommended, 107  
   independent in each release direction, snowboards, 132  
 Risk  
   behavior, injury and, 3  
   factors, skiing and snowboarding, 166

**S****Safety**

- mitigating hazards, 35
- reduced visual acuity and, 11
- visual acuity and, effect of colored lenses, 23

Side-hills, mitigating hazards, 35

Signal detection theory, 120

Ski-binding-boot system, signal detection theory, 120

Ski bindings, comparison of needed and recommended retention settings, 107

Skier Knowledge Questionnaire, 3

Skiers Responsibility Code, 3

Ski injuries, comparison of knowledge and behavior in youth, 3

Skin temperature, 50

Slope gradient, 35

**Snowboarding**

- ankle deflection during forward fall, 82
- eight year study, 141

injuries, comparison of knowledge and behavior in youth, 3

risk factors, 166

Snowboards, release binding, 132

Spinal cord injury, epidemiological study, 150

Stereoscopic depth perception, effect of colored lenses, 23

**T**

Talus fracture, snowboarding, 141

Tibial fractures, mid-shaft, release/retention and, 120

Trail configuration and maintenance, 35

Training, risk of avalanche fatality, 45

**V**

Vision, reduced, safety and, 11, 23

**W**

Warm-up programs, efficacy, 50

Wrist injury, snowboarding, 141

**Y**

Youth, comparison of knowledge and behavior, 3
