Subject Index

A

Annealing, 69
Arsenic, 13
ASTM standards, 13, 32

B

Bayesian analysis, 102
Bivariate distribution, 69
Block failure, 262
Block value estimation, 20

C

Conceptual interpretation, 3
Conditional probability, 133
Conductivity, 162
Contamination
  copper, 146
  delineation, 88, 102
  lead, 13, 133
  metal, 13, 51, 133, 146
  plume mapping, 162
  site mapping, 69
  soil, 133
  stationarity, assessment with, 117
  subsurface, 162
  transport, 181
  uranium, 51
Contouring, 133
Copper, 146
Core data, 218
Correlogram, 13

D

Design analysis, 3
Direct measurement, 3

E

Earthquakes, 236
Electrical resistivity, 69
Electromagnetics, 162
Estimation procedures, 20

F

Flow model, 51
Flow simulation, 181

H

Histogram, 32
Hotspots, 133
Hydraulic conductivity, 181, 200
Hydraulic head analysis, 51

I

Indicator simulation, 218
Infiltrometer, 200
Interpolation techniques, 20
Inverse-distance weighting, 51
Irrigation practices, 248

J

Joint model, 262

K

Kriging, 20, 32, 162, 200, 262
  cokriging, 88, 181
  indicator, 69, 102, 117, 133, 236, 262
  lognormal, 51

L

Leachate, 162
Lead, 13, 133

M

Mapping, 20, 32, 51, 200
  plume, 162, 181
  probability, 69
Markov-Bayes simulation, 200
Matrix approach, 262

Copyright© 1996 by ASTM International www.astm.org

Mercalli intensity, 236
Metals, heavy, 13, 133
Mine effluent, 146
Modeling
  flow, 51
  histogram, 32
  joint, 262
  numerical, 218
  spatial variability measures, 13
  stationary, 117
  stochastic, 117, 146
  transport, 102
  variogram, 13, 32, 218, 236, 248
  water quality, 146
Multivariate approach, 88, 200

N

Nitrate, 248
Numerical methods, 3
Numerical model, 218

P

Pit slope stability, 262
Polycyclic aromatic hydrocarbons, 69
Probabilistic stability analysis, 262

R

Repository system, 218
Rock quality designation, 218

S

Sampling program
  adaptive, 102
  planning, 13
  strategy, 102
Second order stationarity, 117
Seismic hazard, 236
Site characterization, 102
Site remediation strategies, 32
Soil classifications, 181
Soil contamination, 133
Soil gas measurements, 88
Soil nitrate, 248
Space-time series, 146
Spatial patterns analysis, 248
Spatial simulation, 200
Spatial temporal analysis, 51
Spatial variation, 13, 20, 248
  modeling, 32
Stability analysis, 262
Stationarity, second order, 117
Stationary model, 117
Statistical methods, 3
Stochastic images, 200
Stochastic modeling, 117, 146
Structural stability, 262
Subway tunnels, 262

T

Transport simulation, 102, 181

U

Uncertainty, 102
  characterization, 69
  measures, kriging, 51
Uranium, 51

V

Variogram, 13, 32, 218, 236
  semivariograms, 248
Variographies, 88
Volatile organic screening, 88

W

Water quality modeling, 146
