### NOTE

The Society is not responsible, as a body,  
for the statements and opinions  
advanced in this publication.

### Peer Review Policy

Each paper published in this volume was evaluated by three peer reviewers. The authors addressed all of the reviewers' comments to the satisfaction of both the technical editor(s) and the ASTM Committee on Publications.

The quality of the papers in this publication reflects not only the obvious efforts of the authors and the technical editor(s), but also the work of these peer reviewers. The ASTM Committee on Publications acknowledges with appreciation their dedication and contribution of time and effort on behalf of ASTM.

# Foreword

This publication, *Physico-Chemical Aspects of Soil and Related Materials*, contains papers presented at the symposium on Physico-Chemical Aspects of Soil, Rock, and Related Materials, which was held in St. Louis, Missouri, on 29 June 1989. The symposium was sponsored by ASTM Committee D-18 on Soil and Rock and its Subcommittee D18.06 on Physico-Chemical Properties of Soils and Rocks. Symposium cochairmen were Keith Hoddinott, U.S. Army Environmental Hygiene Agency, Robert O. Lamb, Trinity Engineering Testing Corp., and Alan J. Lutenegger, University of Massachusetts.
