## Foreword

This publication, *Applications of Inductively Coupled Plasma-Mass Spectrometry to Radionuclide Determinations*, contains papers presented at the symposium of the same name, held in Gatlinburg, Tennessee on 13–14 October 1994. The symposium was sponsored by ASTM Committee C-26 on Nuclear Fuel Cycle, the United States Department of Energy, and Oak Ridge National Laboratory. Roy W. Morrow of Lockheed-Martin Energy Systems in Oak Ridge, Tennessee and Jeffrey S. Crain of the Argonne National Laboratory in Argonne, Illinois presided as symposium chairmen and are editors of the resulting publication.
