Foreword

The papers in this publication were presented at a symposium on "The Durability of Adhesive Joints" held in Washington, D. C. on October 13, 1965. This symposium was sponsored by ASTM Committee D-14 on Adhesives. Papers of both practical and theoretical significance were presented. The chairman of the symposium was C. F. Carter, E. I. du Pont de Nemours and Co., Inc.

Contents

Introduction	1
Can the Service Life of Bonds Be Predicted?—P. L. NORTHCOTT, H. G. M. COLBECK, AND A. KOZAK	3
Durability of Adhesive-Bonded Aluminum Joints Exposed to Outdoor Weathering—J. A. SCOTT	16
Durability of Adhesive Peel Joints While Stressed in Water—G. F. CARTER	28
Durability of Bonded Housing Components—R. M. KELL AND C. W. COOPER	39
A Bayes Evaluation of Building Materials Reliability—C. W. HAMILTON	51
Accelerated Tests for Deterioration of Adhesive Bonds in Plywood—P. L. NORTHCOTT AND W. V. HANCOCK	62
Softwood Plywood Adhesive Bonds for Construction Uses—C. N. CONE ..	80
Effects of South Florida Weathering on Structural Adhesive Joints—C. I. HAUSE, W. C. PAGEL, AND A. G. MCKOWN	94

THIS PUBLICATION is one of many issued by the American Society for Testing and Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Much of the data result from the voluntary contributions of many of the country's leading technical authorities from industry, scientific agencies, and government.

Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the ASTM technical committees, or compilations of data developed in special Society groups with many organizations cooperating. A list of ASTM publications and information on the work of the Society will be furnished on request.
