Foreword

The symposium on Physical Testing of Plastics—Correlation with End-Use Performance was held in Philadelphia, Pennsylvania, 20 June 1979. The symposium was sponsored by the American Society for Testing and Materials' through its Committee D-20 on Plastics and Subcommittee D20.10 on Mechanical Properties. R. E. Evans, American Cyanamid Company, presided as chairman of the symposium and editor of this publication.

A Note of Appreciation to Reviewers

This publication is made possible by the authors and, also, the unheralded efforts of the reviewers. This body of technical experts whose dedication, sacrifice of time and effort, and collective wisdom in reviewing the papers must be acknowledged. The quality level of ASTM publications is a direct function of their respected opinions. On behalf of ASTM we acknowledge with appreciation their contribution.

Contents

Introduction	1
A Rationale for Testing to Establish Suitability for an End-Use Application— R. E. EVANS	3
Fracture Toughness Testing of HDPE Plastic Pipe— P. FLUELER, D. R. ROBERTS, J. F. MANDELL, AND F. J. MCGARRY	15
Fatigue and Its Relationship to End-Use Performance— H. S. LOVELESS, L. R. INGLE, AND C. E. GERRARD	32
Instrumented Impact Testing for Evaluating End-Use Performance— D. R. IRELAND	45
Instrumented Impact Measurements on Some Polymers— J. K. RIEKE	59
On Abrasion, Scratch, and Friction Testing—Relationship to End-Use Application— J. F. CARROLL	77
Wear Testing—Correlation with End-Use Performance— N. S. EISS, JR.	91
The Need for More Descriptive and Meaningful Physical Data on Plastic Materials— F. S. PANG AND J. L. ISAACS	101
Testing Plastics for Performance: Meeting the Challenge of the Future— J. L. O'TOOLE	109
Summary	114
Index	121
