

ENVIRONMENTAL PRODUCT DECLARATION

WoodWorks® ACGI Flat Panels: SS2, SS3, SS4

COMPOSITE WOOD PANELS WITH REAL WOOD VENEER

Woodworks® ACGI Flat Panels

COMMITTED TO SUSTAINABILITY

Armstrong World Industries leads in delivering solutions that meet today's most stringent industry sustainability standards. We are committed to environmental responsibility in all aspects of our business, and carbon reduction is part of our 2030 Company goals and ambitions.

We were one of the first companies to create and publish the Environmental Product Declaration (EPD) in the ceiling industry. We have over a decade of experience using Life Cycle Assessment (LCA) to evaluate environmental impacts of our products starting with design, to raw materials, and through our operations. We are constantly working to optimize our operations and products to reduce their environmental impact. We believe the use of LCA and our commitment to transparency of our products' carbon footprint is critical to contributing to decarbonization of the built environment.

LIMITATIONS	
<p>Environmental declarations from different programs (ISO 14025) may not be comparable.</p> <p>Comparison of the environmental performance of Non-Metal Ceiling Panels using EPD information shall be based on the product's use and impacts at the building level, and therefore EPDs may not be used for comparability purposes when not considering the building energy use phase as instructed under this PCR.</p> <p>Full conformance with this PCR allows EPD comparability only when all stages of a life cycle have been considered. However, variations and deviations are possible. Example of variations: Different LCA software and background LCI datasets may lead to differences in results for upstream or downstream of the life cycle stages declared.</p> <p>ASTM certification of this EPD is not to be construed as representing aesthetics or any other attributes not specifically addressed, nor should it be construed as an ASTM endorsement of the subject of the EPD or a recommendation for its use. There is no warranty by ASTM, express or implied, as to any finding or other matter in the EPD, or as to any product covered by the EPD. The EPD holder is liable for the information and evidence on which the EPD is based.</p>

2. GENERAL INFORMATION

2.1 DESCRIPTION OF ORGANIZATION

Armstrong World Industries, Inc. (AWI) is a leader in the design and manufacture of innovative commercial and residential ceiling, wall and suspension system solutions in the Americas. At home, at work, in healthcare facilities, classrooms, stores, or restaurants, Armstrong World Industries offers interior solutions that help to enhance comfort, save time, improve building efficiency and overall performance, and create beautiful spaces.

For more than 150 years, we have built our business on trust and integrity. It set us apart then, and it sets us apart now, along with our ability to collaborate with, and innovate for the people we're here to serve – our customers, our shareholders, our communities, and our employees.

We are committed to developing new and sustainable ceiling solutions, with design and performance possibilities that make a positive difference in spaces where we live, work, learn, heal, and play.

2.2 PRODUCT DESCRIPTION

WoodWorks® ACGI Flat Panels (SS2, SS3, SS4) are real wood veneers on fire rated particle board. the LC does not include hanger wires, molding, or attachment/hold down clips (UNSPSC Code 30161601 and CSI 09-50-00).

Features:

- Acoustics on Perforated Panels: NRC up to 0.85
- Flat Panel Systems are available in a variety of Veneer Species and custom stains
- Panels are easily removable for accessibility above the ceiling. Perforation options and acoustic insulation are available to control sound absorption
- Fire Rating: Veneer Wood (Non-Perforated) – Class A: ASTM E84-21, Standard Test Method for Surface Burning Characteristics of Building Materials, surface burning characteristics
- Suggested Suspension System: Prelude XL Grid with varied reveal options

2.2.1 Product Identification

WoodWorks® ACGI Flat Panels (SS2, SS3, SS4) are real wood veneers on fire rated particle board without solid wood frames.

Figure 1. Composition of a WoodWorks® ACGI Ceiling Panel

2.2.2 Product Specification

Products covered by this declaration are classified by ASTM E1264-22, Standard Classification for Acoustical Ceiling Products, Section 5.2 as Type XX. This declaration includes WoodWorks® ACGI Flat Panels (SS2, SS3, SS4).

ENVIRONMENTAL PRODUCT DECLARATION

WOODWORKS® ACGI FLAT PANELS: SS2, SS3, SS4
COMPOSITE WOOD PANELS WITH REAL WOOD VENEER

According to ISO
14025 AND
ISO 21930

2.2.3 Flow Diagram

WoodWorks® ACGI Flat Panels are manufactured in Marshfield, MO using an adhesion and coating process. Particleboard and veneer sheets are delivered to the manufacturing facility. The veneer sheets are then adhered to the particle board and pressed to ensure a good bond.

The sheets are then cut, perforated (if required) and given a final protective coating that is UV cured. After packaging, the material is shipped and installed. At the end of its useful life, the ceiling panel can then be sent to a landfill, or incinerated.

14025 AND
ISO 21930

2.3 PRODUCT AVERAGE

2.3.1 Product-Specific EPD

This declaration is WoodWorks® ACGI Flat Panels including SS2, SS3, SS4. A weighted average approach was applied. Inputs for Woodworks ACGI Flat Panels were developed based on 2021 production volumes and weights.

2.4 APPLICATION

This product is for application in commercial buildings.

2.5 MATERIAL COMPOSITION

TABLE 1. MATERIAL COMPOSITION

Major materials used in ceiling panel manufacturing are summarized in the table below.

Material	Percent by Weight
Particleboard	85-90%
Veneer	5-10%
Acoustic Fabric	<1%
Coating	<1%
Adhesive	<1%

2.6 TECHNICAL REQUIREMENTS

TABLE 2. TECHNICAL DATA

Name & Test Method	Value	Unit
Sound absorption coefficient (NRC) (ASTM C423)	up to 0.85	NRC
Light reflectance (ASTM E1477)	-	n/a
Interzone attenuation of open office components (AC) (ASTM E1111 and ASTM E1110)	-	n/a
Sound Transmission Class (STC) (ASTM E413 and ASTM E90)	-	dB
Sound attenuation between rooms sharing a common ceiling plenum (CAC) (ASTM E1414 and Classification E413)	-	dB
Surface burning characteristics of building materials (ASTM E84, ASTM E1264)	Class A	Flame spread/ smoke developed

2.7 PROPERTIES OF DECLARED PRODUCT AS DELIVERED

The final EPD is available on the Armstrong website (armstrongceilings.com/epd) and is under the Finish category in the EC3 Tool (buildingtransparency.org).

3. METHODOLOGICAL FRAMEWORK

This study provides life cycle inventory and environmental impacts relevant to WoodWorks® ACGI Flat Panels. The LCA follows an attributional approach as outlined in ISO 21930 Section 7.1.1- see also PCR Part A-6.

3.1 DECLARED UNIT

The declaration refers to the declared unit of 0.093 m² (1 ft²) of installed ceiling panel, with reference service life (RSL) of 30-years.

ENVIRONMENTAL PRODUCT DECLARATION

WOODWORKS® ACGI FLAT PANELS: SS2, SS3, SS4
 COMPOSITE WOOD PANELS WITH REAL WOOD VENEER

According to ISO
 14025 AND
 ISO 21930

This study provides life cycle inventory and environmental impacts relevant to WoodWorks® ACGI Flat Panels. The LCA follows an attributional approach as outlined in ISO 21930 Section 7.1.1- see also PCR Part A-6.

3.1 DECLARED UNIT

The declaration refers to the declared unit of 0.093 m² (1 ft²) of installed ceiling panel, with reference service life (RSL) of 30-years

3.2 DECLARED UNIT PROPERTIES

TABLE 3. DECLARED UNIT PROPERTIES

Name	Value	Unit
Declared unit	0.093 (1)	m ² (ft ²)
Thickness	1.905 (0.75)	cm (in)
Surface weight per declared unit	11.06 (2.46)	kg/m ² (lb/ft ²)
Density per declared unit	630 (39.3)	kg/m ³ (lb/ft ³)

3.3 SYSTEM BOUNDARY

The scope of the study includes production, installation, and end of life. Production of capital equipment, facilities, and infrastructure required for manufacture are outside the scope of this assessment. Details of inclusions and exclusions from the system boundary are listed below.

TABLE 4. ELEMENTS INCLUDED IN THE CRADLE TO GATE WITH OPTIONS STUDY

Includes	Excludes
<ul style="list-style-type: none"> – Raw materials production (A1) – Inbound transport of raw materials to production facility (A2) – Manufacturing of panels (A3) – Electricity and fuel combustion (A3) – Packaging of final products (A3) – Transportation to the job site (A4) – Installation and installation waste (A5) – Deconstruction – manual, no impact (C1) – End of life, including transport (C2-C4) 	<ul style="list-style-type: none"> – Construction of capital equipment and other infrastructure flows – Maintenance and operation of support equipment – Human labor and employee transport – Manufacture and transport of packaging materials not associated with final product – Use Phase (B1 to B7) – Benefits and loads beyond the system boundary (D)

3.4 PRODUCT-SPECIFIC CALCULATIONS FOR END-OF-LIFE PHASE (MODULES C1-C4)

At this time, there is no industry consensus for product-specific assumption behind reported scenarios for information in modules C1-C4. For this study, the end-of-life product scenario was based on the US EPA 2018 Data on Construction and Demolition Debris. Based on this data, ~74% of wood construction and demolition waste is landfilled and ~22% is incinerated.

ENVIRONMENTAL PRODUCT DECLARATION

WOODWORKS® ACGI FLAT PANELS: SS2, SS3, SS4
COMPOSITE WOOD PANELS WITH REAL WOOD VENEER

According to ISO
14025 AND
ISO 21930

3.5 REFERENCE SERVICE LIFE AND ESTIMATED BUILDING SERVICE LIFE

In accordance with the PCR, the Reference Service Life (RSL) for this study was assumed to be 30 years and the Building's Estimated Service Life of was assumed to be 75 years.

3.6 ALLOCATION

Allocation at the manufacturing plant was based on production volume. Allocation of background data (energy and materials) taken from the GaBi databases.

3.7 CUT-OFF RULES

No cut-off rules are defined for this study. The system boundary was defined based on relevance to the goal of the study. For the processes within the system boundary, all available energy and material flow data have been included in the model. In cases where no matching life cycle inventories are available to represent a flow, proxy data have been applied based on conservative assumptions regarding environmental impacts.

3.8 DATA SOURCES

Primary data for this study was collected from the manufacturing facility for 2021 and datasets for materials upstream from manufacturing were obtained from the GaBi database version 10.6.1.35.

3.9 DATA QUALITY

The data quality ranges from good to very good. The temporal quality of the data is very good with both manufacturing specific data and GaBi background data from 2021.

3.10 PERIOD UNDER REVIEW

All the primary data in the scope of this analysis was collected from Armstrong manufacturing facilities during 2021.

3.11 COMPARABILITY AND BENCHMARKING

WoodWorks® ACGI Flat Panels offer a unique set of product attributes and we do not have any data on comparable non-competitive products to report.

3.12 ESTIMATES AND ASSUMPTIONS

The datasets for materials upstream from manufacturing are from the GaBi database. When inventories were not available for materials, conservative proxy datasets were chosen based on similarity of material. Additionally and consistent with the PCR, the following assumptions in Table 3 related to transport, installation, and deconstruction procedures were made.

TABLE 5. TRANSPORT, INSTALLATION, AND DECONSTRUCTION PROCEDURES

Product transport from point of manufacture to building site	Mode: Diesel-powered truck/trailer Distance: 800 km
Product transport from building site to waste processing	Mode: Diesel-powered truck/trailer Distance: 35 km
Installation & deconstruction procedures	Manual (no operational energy use)

3.13 UNITS

Units commonly used in the North American market are included in addition to the required SI units..

14025 AND
ISO 21930

4. TECHNICAL INFORMATION AND SCENARIOS

4.1 MANUFACTURING

The manufacturing process has been described in a simple flow chart in Section 2.

4.2 PACKAGING

WoodWorks® ACGI Flat Panels are well packaged in a variety of wooden panels, rigid corrugate, and stretch wrap. Stacks of material are banded to wooden pallets for shipping.

4.3 TRANSPORTATION

The following information specifies any transport after the manufacturing gate. Details of type of transport, type of vehicle, distance, type, and amount of energy carrier are listed. These values are consistent with industry standard assumptions.

TABLE 6. TRANSPORT TO THE BUILDING SITE (A4)

Name	Value	Unit
Fuel type	Diesel	
Liters of fuel	3.14E-03	L/100km
Vehicle type	Truck	
Transport distance	805	km
Capacity utilization	67	%
Weight of products transported	1.12	kg
Volume of products transported	0.0017	m ³
Capacity utilization volume factor packaging products	1	

4.4 PRODUCT INSTALLATION

The ceiling system must be installed in accordance with Armstrong Ceilings installation guidelines. Our ceiling system installation brochure, "Installing Suspended Ceilings", is a general application overview, covering essential steps of a basic suspended ceiling installation. You can reference this document at armstrongceilings.com/installationinstructions

4.6 DISPOSAL

End of Life

The end-of-life phase for the ceiling panels was included in the study. End-of-life impacts include landfill disposal of ceiling panels, scrap, and packaging at the end of installation.

TABLE 8. END OF LIFE (C1-C4)

Name		Value	Unit
Assumptions for scenario development (description of deconstruction, collection, recovery, disposal method, and transportation)			
Collection process (specified by type)	Collected separately	0	kg
	Collected with mixed construction waste	0	kg
Recovery (specified by type)	Reuse	0	kg
	Recycling	0	kg
	Incineration	0	kg
	Incineration with energy recovery	0	kg
	Energy conversion (specify efficiency rate)	-	
Disposal (specified by type)	Product or material for final disposal	1.12	kg
Removals of biogenic carbon (excluding packaging)		0	kg CO ₂

4.7 REUSE PHASE

TABLE 9. REUSE, RECOVERY, AND/OR RECYCLING POTENTIALS (D), RELEVANT SCENARIO INFORMATION

Name	Value	Unit
Net energy benefit from energy recovery from waste treatment declared as exported energy in C3 (R>0.6)	0	MJ
Net energy benefit from thermal energy due to treatment of waste declared as exported energy in C4 (R<0.6)	0	MJ
Net energy benefit from material flow declared in C3 for energy recovery	0	MJ
Process and conversion efficiencies	-

5. ENVIRONMENTAL INDICATORS DERIVED FROM LCA

5.1 LCA RESULTS

The Life Cycle Assessment (LCA) was performed according to ISO 14040 guidelines and follows the specific PCR instructions. The cradle-to-gate with options LCA consists of raw material production, transport of raw materials to production facility prior to processing, manufacturing of ceiling panels, packaging; transportation to job site and installation, use phase, and end of life.

TABLE 10. DESCRIPTION OF THE SYSTEM BOUNDARY MODULES (X = INCLUDED IN LCA; MND = MODULE NOT DECLARED)

EPD Type	Production			Construction		Use							End Of Life				Benefits And Loads Beyond System Boundary

5.2 LCA RESULTS FROM LCIA

Life cycle impacts reported below are based on TRACI 2.1 methodology. Results are provided in reference to the declared unit. For the other impact categories, results are presented in the tables below using the ISO 21930 standard and for the declared unit. Because products include biobased content, they store or sequester carbon. Table 11 includes both Global Warming Potential (GWP) excluding biogenic and GWP including biogenic carbon. LCIA results are relative expressions and do not predict impacts on category endpoints, the exceeding of thresholds, safety margins or risks. These six impact categories are globally deemed mature enough to be included in Type III environmental declarations. Other categories are being developed and defined and LCA should continue making advances in their development. However, the EPD users shall not use additional measures for comparative purposes.

6. LCA: INTERPRETATION

Based on the LCA Model of the ceiling life cycle covered in this study, it was concluded that the ceiling panel manufacturing process and raw materials in the ceiling panel have the greatest impact on “carbon footprint” as represented by Global Warming Potential [GWP].

7. ADDITIONAL ENVIRONMENTAL INFORMATION

7.1 ENVIRONMENT AND HEALTH DURING MANUFACTURING

Armstrong World Industries has a comprehensive environmental, health, and safety management program. Risk reduction begins in the product design process. All products go through a safety, health, and environmental review prior to sale. Armstrong also has a long-standing commitment to the safety and health of all our employees.

Armstrong World Industries is equally committed to reducing our environmental impact. As with safety goals, each manufacturing facility has environmental initiatives focused on responsible use of energy and water, and on waste reduction.

7.2 ENVIRONMENT AND HEALTH DURING INSTALLATION

All recommendations shall be utilized as indicated by SDS and installation guidelines. Specific product SDS and installation instructions can be downloaded at: armstrongceilings.com/content/dam/armstrongceilings/commercial/north-america/sds/woodworks-sds.pdf

7.3 QUALITY

Armstrong World Industries has a robust internal Quality Assurance process that is based on industry-accepted best practices and is led by a team of quality professionals who have been certified by the American Society for Quality. The Armstrong Ceilings acoustical laboratory is ISO 17025 certified and is accredited by the National Voluntary Laboratory Accreditation Program (NVLAP).

7.4 ENVIRONMENTAL ACTIVITIES AND CERTIFICATIONS

All environmental certifications can be found at: Armstrongceilings.com

Technical Downloads & Resources: armstrongceilings.com/commercial/en/commercial-ceilings-walls/custom-wood-ceilings/woodworks-acgi-flat-panels.html

7.5 FURTHER INFORMATION

Additional Information can be found at: armstrongceilings.com

8. PROJECT REPORT AND SUPPORTING DOCUMENTATION

This study provides life cycle inventory and environmental impacts relevant to Armstrong® suspended ceilings. This report is intended to fulfill the reporting requirements in Section 5 of ISO 14044 and Product Category Rules Guidance for Building-Related Products and Services UL® Environments (2021) Part B: Non-Metal Ceiling Panel EPD Requirements.
